Really nice userbars, I really cannot say anything bad about these. They are clean, beautiful, and an excellent example of genuine original graphic artwork.

Nice userbars, but the texts should be easier to see.

Damn, these are sick dude!

What are these for, I thought you were suggesting them for HF but they're different ranks :O

Hey man these look really cool, I really like the colors and the design of the userbar and just like stated above just make the text easier to read.

Their pretty dope but i think they are a little to thin.

FlexiN - June 2, 2014, 9:56 pm

Thanks for the feedback again guys, I'm planning on releasing multiple Forum userbar packs with the PSD included. I have a really good idea, I'm sure you guys will like it.

I like the overall style of the boxes, but I think the text should be wider, or a different font.

GOLD looks like OOLD, but I'd call them an 8/10. ?
