Thread: [\[Noob question\] Can't find server module button?](#)

Madison Ivy - June 2, 2014, 8:46 am

Hello, I'm trying to set up DC for the first time ever and looking at guides I should go to "server module" to set up my server. However, I can't find it at all. This is what it looks like:

All help is appreciated :)

You downloaded the legacy version of dark comet. This version is sorta like team viewer and is the legal version. I would recommend version 5.3.
