Meso's | Web ForensicsFree Web Forensics/Footprint Removal Service

About

This service used to be for my unofficial group here on HackForums known as "Sanctum".. Sanctum disbanded due to members leaving HF as well as some IRL shinnanigans going down. I have decided to again open this service, and to offer it to those that need it. Please look at the vouches to show how valid your time can be during this particular service.

What I Provide

After the high demand for this particular service, I have decided to do a free doxing service for limited time slots, in which members of HackForums can ask me to dox others, or de-trace themselves (remove your digital footprint). I have been highly recommended for this particular service due to being a skilled individual in web forensics and tracing, that is sure to get you the results you are looking for, and the best part about it... It's free. For a limited time that is.
