Thread: [Official Group - The Empire - Designer & Developer Recruitment - Earn Money](#)

Tibit - June 2, 2014, 9:06 pm

[img]http://imageshack.us/a/img90/6030/bannermo.gif[/img]

General Introduction:

This recruitment will be targeted solely towards developers. We have some job openings in the product line and would also like to have more developers within the group. We will be adding a few members and giving them the option of just being a member in the group, or being apart of the product line team, working on projects here on HF and/or off-site for a share of the profits. If you are interested, feel free to apply.

We are looking for programmers and designers, preferably people who know multiple programming languages, specifically non-dependent languages and web development.

The last Recruitment Thread can be located [here](#). This recruitment thread will last a few days.

Forum Icon:

[IMG]http://x.hackforums.net/uploads/ficons/empire2-f.png[/IMG]

Userbar:

[img]http://x.hackforums.net/images/modern_bl/groupimages/english/empirev3.gif[/img]

Basic Guidelines:

Must have acceptable grammar

Usually an upgraded member or a very committed non-upgraded member

No LQP or Harassment Warnings

No legitimate open or unresolved scam reports

No trolling or flaming other members

Application:

Note: Try to set yourself apart from the rest, use your skills to show you are the best choice for the position. Only a couple will be let in on the product team, each should earn thousands per month from their work.

This application is very basic, feel free to add onto it, think of it as a resume, show examples of past works and describe your skills.

Code [b]Name:[/b]

[Eternal.](#)
[vitafortis](#)

Good luck to all that apply, this round of recruitment will only last for a short time.

Zuse - June 2, 2014, 9:09 pm

Good luck to everyone that applies! Can't wait to see some of the applications.

Programming - June 2, 2014, 9:09 pm

Name: Anthony

Age: 15

Gender: M

State/Country: Arizona, USA

Time Zone: MNT AZ

Explain, with detailed examples, what your skills are: Programming in general, C#, VB, HTML, CSS, PHP, Java, etc.

Why do you personally feel you deserve to and should be chosen?:

I could be a valuable addition for the group, I also try to stay as HQ as possible.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

I'm 15 years old, I live in Phoenix, Arizona. I'd describe myself as a professional programmer in some terms. I do freelancing work, and I have a guaranteed job at 16 for a company being there new software engineer. I would love to join this group, I've heard lots of good things about it. I hope you choose me as a new member!

PORTFOLIO: <http://www.inspirecoding.com/prof/> <- Half done.

Kenny West - June 2, 2014, 9:09 pm

Although I don't meet the requirement, good luck to everyone who applies!

Hydraulic - June 2, 2014, 9:10 pm

Good luck to everyone applying, The Empire is truly an amazing group!

Cooligan - June 2, 2014, 9:18 pm

Good luck to everyone who applies. I'm looking forward to seeing some new faces noobs.

Troye - June 2, 2014, 9:21 pm

Good luck to all members applying for The Empire. It is one of the few groups I love on Hack Forums. Make sure to take the extra effort on your applications.

Joy - June 2, 2014, 9:28 pm

My 1000th Post

[img]http://imgizor.imageshack.us/a/img90/6030/bannermo.gif[/img]

Name: Joy Samaddar

Age: 14

Gender: Male

State/Country: India

Time Zone: GMT +5:30

Explain, with detailed examples, what your skills are: I am a designer and a marketer. I do flashy as well as flat type of designs. I make illustration and i am learning Adobe After Effects. I am look to join a group so that i can cooperate with others members and earn more and learn more.

Why do you personally feel you deserve to and should be chosen?: I deserve to be chosen because I meet all the requirements and i can bring some good to this group.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I am a 14 year old boy.. uhmm nothing else to say. I am not really a talker. My previous works - jopy2000.minus.com

Hmm it is not too good but i am improving every day.

Anything else you would like to say: All hail the king of the Empire's.

Vent - June 2, 2014, 9:49 pm

Good luck to everybody applying, this is easily the best group I've ever been in.

Like Tibit said, try to stand out. The best way to do that in my opinion is to incorporate your skills into your application somehow. Maybe create a quick game or quiz that can be used as your application, or create a website.

mvmt - June 2, 2014, 9:55 pm

EDIT: My online portfolio (under construction still) <http://fadegraphics.net/>

Going to keep this short and sweet.

Name: Alec

Age: 16

Gender: Male

State/Country: Indiana - USA

Time Zone: CST

Explain, with detailed examples, what your skills are: I'm a self-taught designer with over 3 years of experience under my belt. From my years of experience, I have recently founded/co-developed a new designing/development team in which we specialize in iPhone/Android Applications, graphic design and website development for personal/corporate use (you can view the teams website here: <http://incentivegames.co.uk/> for proof). I take web design classes in school, along with teaching myself new things with online tutorials and such.

Why do you personally feel you deserve to and should be chosen?: I believe I should be chosen into The Empire because of my hard work and dedication to anything that I work on. I'm currently running 5 projects: my own graphics shop, designing for IncentiveGames, running my BTC Exchange Service, doing giveaways on HF, and creating a full CPA/PPD website that offers BTC payouts, all while juggling real life responsibilities like a job, visiting with family, friends, and my girlfriend. Although this does keep me busy, it has shaped me into a hard worker and there is no doubt I give anything less while working with The Empire. I love learning, so if I were to be accepted I could share my knowledge, along with take in others knowledge in the sub-forum.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I feel like these questions are repeating themselves so I will not explain everything again, but I will link some of my work in a spoiler below.

Spoiler ([Click to View](#))

I did not embed they images due to them being pretty large.

-My shop which contains some more previous work

<https://hackforums.net/showthread.php?tid=3440550>

-Custom painted app background

<https://i.imgur.com/t40TM2H.jpg>

-Logo for YouTube Network

<https://i.imgur.com/wXlv5So.png>

Anything else you would like to say: This is about all I have to say other than thanks for the opportunity to join The Empire. Thanks for considering my application and good luck to anyone else applying.

Tusik - June 3, 2014, 3:39 am

Name: Preston T. (PM for website)

Age: 21

Gender: Male

State/Country: Texas, USA

Time Zone: CST

Explain, with detailed examples, what your skills are: Coding Skills/Things I have worked with - Ember.js, SendGrid, Twilio, Iron.io MQ, AWS EC2, AWS S3, AWS ElastiCache, Algolia, AWS RDS, Zendesk API, MailChimp, Stripe API, Dwolla API, Paypal API, Javascript, PHP, Loggly, New Relic,

Coinbase API, Balanced Payments, Facebook API, Google Analytics, Google Plus API, Node.js, DigiCert, NPM, Grunt.js, Git(Bitbucket and Github), PhpStorm, Emblem javascript templates, C++, Java, HTML, CSS, and several other things.

Why do you personally feel you deserve to and should be chosen?: I have been apart of these forums for a long while and I know a lot about code development and business startups. I have launched a business of my own. This business has been in stealth since Jan 2013 and we just released it publicly late march 2014. I have spent 2000+ hours into this project. The website is <https://www.4virtuals.com>.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I was top 3% of my high school class and now I'm a senior in college. In high school I had a business that sold modifications for games that profiled ~45k in a short period of time before I had to refocus on school work. The whole reason for my business now is because of the business I had in high school. People still try to sell their programs, plugins, graphics, and any other virtual goods on forums just by using something like Skype. Something needs to change here.

Anything else you would like to say: Don't want to brag but 2000+ hours of work = 90k lines of developed code + 500k plus in libraries.

Let me know if you need more information from me.

Tibit - June 3, 2014, 10:18 am

Be sure to show examples of your past work if you can, increases your chances.

Rayyy - June 3, 2014, 10:55 am

// Empire Application \\\

Spoiler ([Click to View](#))

diiiaz - June 3, 2014, 10:56 am

Good luck to everyone who applies. The Empire is life.

theAbsolute - June 3, 2014, 11:13 am

Name: theAbsolute

Age: -

Gender: Male

State/Country: Serbia

Time Zone: (UTC+01:00)

Explain, with detailed examples, what your skills are:

Creating websites professionally for more then 5 years now. HTML5 and CSS3 are something that I use very well. I am familiar with responsive design too. I am able to create PSD template, convert PSD to HTML or create HTML template from scratch. At the moment I am studying jQuery. Beside that, I have some knowledge in Flash, Illustrator and even After Effects, so I can make graphic elements such as logos or banners.

Skills: HTML, CSS, jQuery, Responsive design, Photoshop

Even I'm a designer at first place, I have advanced knowledge in PHP and I am able to work at smaller/medium programming projects. Familiar with PDO and website security as well such as HTML injection, SQL injection, XSS vulnerabilities, passwords cryptography and similar.

Skills: PHP, MySQL, PDO, Security

I am very familiar with most popular open source CMS's ,Joomla and WordPress. I'm able to create templates for these from scratch or edit existing templates, install and edit addons and so on. I can say that I have very advanced knowledge in these and long experience with them.

Also, I am good at optimizing website speed.

Some of my tutorials regrading this topic:

[Contact form giveaway](#)

[Comments design giveaway](#)

[Real Estate template + PHP giveaway](#)

Why do you personally feel you deserve to and should be chosen?:

I definitely have lot of knowledge, I know with clients and how to fit their needs. I respect deadlines and working timeframes. Generally, I can fit as a good worker and be of use.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

Since I played Aladin on Amiga computer first time (this was more then a 15 years ago), I felt in love with computers, and here I am. I don't wear glasses even I am in front of the computer since then.

On examples I fail. First, I wouldn't like to show my works in public, and second thing is that I didn't worked on many projects from scratch, more debugging, helping, fixing and similar.

Anything else you would like to say:

I've just finished my lunch and coffee so I think I am going to take a nap now.

Eternal. - June 3, 2014, 12:17 pm

Good luck to all those who apply. You will be working alongside Tibit and myself if you are chosen.

mvmt - June 3, 2014, 2:08 pm

Can't wait to see the winners, hoping I will get accepted. How many more days until the winners are chosen?

Free Mason - June 3, 2014, 6:03 pm

Name: Free Mason (Dean)

Age: 21

Gender: Male

State/Country: Virginia, U.S.A.

Time Zone: Eastern

Explain, with detailed examples, what your skills are: My skills are very broad, I can code, I a a business man, I run a business and oversee 20 staff members. I am very caring and good with personal issues.

Why do you personally feel you deserve to and should be chosen?: Because I have a very broad amount of knowledge, I am willing to do whatever it takes, I am not afraid to try and learn new things. I am professional and mature.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I am a 21 year old and a Senior In a large Virginia University. I am in fact a Free Mason. I am very charitable and do lots of community work. I am always trying to help people some people even say that I am too kind.

I hunt, fish, am a proud gun owner and support my 2nd amendment right. I drag race a black Chevy s10 with a 405 big block. Goes 0 to 100 mph in 5,7 seconds in a 1/8th mile. Me and my father restore classic cars, such as 73 Cheyennes and Nomad along with Camaros.

I can not proved pictures at this time but soon will make a video of all my works and show everyone.

I really hope to be part of this great group. Thank you.

Anything else you would like to say: I would like to thank you for the opportunity of this recruitment I really hope I can be added back to the Empire, I feel I could gain a lot of knowledge while helping others.

Sajuuk - June 3, 2014, 6:52 pm

Maybe this time around I'll get accepted as a developer.

Turtle???? - June 3, 2014, 9:20 pm

Name: Vik/Yak

Age: 16

Gender: Male

State/Country: Washington (U.S.A)

Time Zone: PST

Explain, with detailed examples, what your skills are:

Out of the many skills that I have, I specialize in video editing, academia, and coding. My video editing can be seen on my youtube channel: [youtube.com/turtleitself](https://www.youtube.com/turtleitself). On the channel, there are several examples of videos were I spent hours and hours using Sony Vegas Pro and Adobe After effects editing my videos to provide entertainment as well as market my products. I furthermore was able to design a unique channel and build up my reputation in the game, as well as develop "bots". Bots are automated programs which involve coding, and coding soon become a favorite hobby of mine and I became an avid coder in the niche of PowerBot, tribot, etc. Finally, my skills in academia definitely display my ability to produce high quality content and develop and design promptly and with alacrity. I run a homework service, and have placed myself in an amicable position for business. I've developed my own way of collecting tuitions from those whom I tutor, and furthermore have coded my own games. One such example is for the Microsoft sponsored "Hunt the Wumpus" (I will show source code if needed, but I don't want to post on here publicly).

Why do you personally feel you deserve to and should be chosen?:

I feel like I should be chosen because I'm a high quality user and skilled in VFX, GFX, and developing. These are lines of sight that I epitomize on and use in my daily work. Since I run a homework business, I constantly develop little programs here and there to help me arrange my schedule better. Since I'm a gamer, I love developing hacks and mods (such as bots for runescape) to help ensure ease of the game. I've taken APCS, and received a 5 on the exam, which can help support my ability to code and develop. Furthermore, my channel displays a variety of content that

bolsters my ability to effectively design. I'm an aspiring GFX person, but am skilled in VFX and am learning the ropes of GFX quickly. Not only am i able to effectively develop programs, but I am also quite avid at marketing things that I design.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

In my signature, my highly reputed homework service is there. This shows my skills in the academia and my commitment to developing and organization when it comes to working. To delve a bit deeper into myself, I have a coder, gamer, and marketing enthusiast. I tend to script privately for users on TriBot and OSBot. I also have coded a game, <http://bit.ly> [WARNING: potentially infected]/getlightrunner, which is available on the google App Store if you are interested in checking that out. I also, with the same peers of this project, created a game similar to "RoTMG (realm of the mad god) - much more simple but it was my first large group project. I have the source code and will gladly compile and show it too you later, but you can check out the app I made if you like. I think it displays and shows that I am an avid developer. Furthermore, I am committed, athletic, and friendly, which I think will help me play an integral part in Empire.

Anything else you would like to say:

I would like to say that developing and designing are definitely only a few of the skills I have to offer, and am looking forward to develop new skills in Empire as well as display all of the myriads of skills that I have. Alone from my homework service I make 1000\$ a month, and it would be amazing to see where coding games and developing other things for money would get me.

Pung0d - June 4, 2014, 1:24 am

[img]<http://imageshack.us/a/img90/6030/bannermo.gif>[/img]

I just finished my application.

Thank you for the opportunity Tibit. I hope this will make some moves.

[Application Here](#)

Marky Marky - June 4, 2014, 2:21 pm

Good luck to everyone who applies!

Empire is the sexiest group out there.

Tibit - June 4, 2014, 7:56 pm

Let's keep this thread solely for applications please. xD

Kevin?? - June 5, 2014, 2:07 am

A good history along with creativity is the key to success. Remember that it's about standing out from the crowd.

?OpDoritos - June 5, 2014, 12:42 pm

Name: Steven

Age: 19

Gender: Male

State/Country: California

Time Zone: PST

Explain, with detailed examples, what your skills are:

When it comes to programming languages I know Java and C++ however I am infinitely more experienced with Java. I mainly do plugins development for Minecraft servers as of late. I have made a variety of different plugins and I am currently working on an RPG that will have similar elements to World of Warcraft and Runescape. I have also been creating a library for myself that will make it easier to do plugin development down the line.

Why do you personally feel you deserve to and should be chosen?:

I deserve to be chosen because I have been programming in Java for three years and I have a proper background in the subject because I learned from school. I am currently going to college for a degree in computer science and I flew through my C++ class without even trying. I currently want to expand my horizons by doing various different projects that I am not used to.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

Well I am 19 and I have been programming in Java for about 3 years now. I started learning in school however I learned that teaching myself was the best way to really learn. So I ended up taking the knowledge I had from school and teaching myself. My interest in programming has let me make custom plugins for my Minecraft server on the fly as well as do a few freelance jobs for making plugins. I try to act as professional as possible and make sure whoever I am working for is happy. In the past I have made multiple innovative plugins that give a real boost to my Minecraft server's profits. I would be more than glad to show examples, if I am even considered please don't hesitate to pm for examples because I would rather keep some things private. Through my experience with running a Minecraft server I have gathered a lot of experience with marketing which could make me a useful asset in upcoming projects.

Anything else you would like to say:

I hope I am considered to join the empire and good luck to all of those that apply.

ASLR - June 5, 2014, 12:56 pm

Name: Freaknik

Age: 16

Gender: M

State/Country: US

Time Zone: Central Time

Explain, with detailed examples, what your skills are: My best skill is probably learning new skills and problem solving ;) But I know a good bit about VB.net, understand java if needed, and I am learning c++ and some assembly too. I am probably best at web development though. I am definitely not a designer but I can make things look decent with bootstrap and some css. I mainly do backend programming for sites in PHP, and I also know enough javascript to make things work how they need too. I can also use git to collaborate and work on projects with others. In fact, I have my own gitlab server that I setup a couple of days ago :) I am also good with linux and setting up servers, also working with mysql and databases.

Why do you personally feel you deserve to and should be chosen?: I have been doing a lot of learning over the past few years and I have been doing a programmer for hire kinda thing lately anyways. It is also summer vacation here so I should have all the time I need to code over the next couple months.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I am an easy going person. I was in the Empire before, I think I might have gotten kicked for not posting frequently enough or something like that, I didn't break any of the rules. I think this time around it would be a lot more interesting since I would actually have a purpose to do stuff, if I got picked anyways. In VB my first huge project was a minecraft alt account manager with proxy support and a lost login file decrypter, but as I said I have been doing web development lately. My last project for a client is a ... not gonna say specifically what it is anyways for features it has a user management system, bitcoin payment gateway with a lot of features using the blockchain.info payment receiving api, a credits system for onsite purchases, a job queuing system for other servers to get jobs from the queue to complete, with an order tracking system. PM me if you want to see it.

Anything else you would like to say: Sounds like a good opportunity. I like coding and I like money ?

Tibit - June 6, 2014, 7:41 am

Be sure to be showing some examples of your past works, or at least describe past works.

WACKO - June 6, 2014, 12:33 pm

[img]http://imageshack.us/a/img90/6030/bannermo.gif[/img]

Name: Wacko

Age: 17

Gender: Male

State/Country: Canada

Time Zone: Eastern

Explain, with detailed examples, what your skills are:

To start, I'm a fairly skilled web developer. I know HTML, CSS, PHP and Javascript. On top of that, I'm also a skilled pentester. I've secured multiple Hackforums products (Obviously not going to give out the names for privacy reasons, but proof can be given upon PM/Somewhere private). I'm good with SQLi (Error based is my personally favourite. I'm very skilled with Error based SQLi), LFI, RFI, SSI, XSS, etc. I can demonstrate upon request to prove my skills.

Why do you personally feel you deserve to and should be chosen?:

I don't have many skills, but the ones I do have that I've mentioned above, I'm very good at.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

I'm a pretty chill guy. I've been in multiple groups, but I've never been in The Empire. It looks like a nice group full of intellectual members and I'd like to see what it has to offer. I have very few projects that are public as I do most of my work privately. I started out in pentesting by hacking HF booters and other products and reporting the vulnerabilities. I've never done anything malicious to a HackForums service. I've begun to start programming, and I am quickly learning languages such as Python, VB and C++. I haven't coded anything major yet. I think I prefer web design over programs though.

Anything else you would like to say:

Empire looks like a great group. I hope I'm chosen and I'm excited to see what it has to offer. Good luck everybody ?

~Wacko

?OPTIC - June 6, 2014, 1:21 pm

I will post this again:

Paragraph:

I am 16 years old and I play football in my school. My life is pretty simple compared to "normal" people in the USA. I go to school and hang out with my friends and girlfriend, study, and participate in extracurricular activities such as soccer. Well something interesting that happened in my life was when I traveled to United Emirates I was shadowing my uncle and he brought me to this house and there were amazing super cars there. Which he actually let me test drive two Ferrari and a Lamborghini. I thought this was one of the best things that happened in my life. I was surprised because I am not the age for driving and especially these amazing cars? Sadly the images of me enjoying these cars where lost because my uncle lost his flip phone while I returned back to America. I know what you are saying "Flip phone" hahahaha, pretty funny but it was a great memory in my brain still. I am going to be truthful, instead of saying lies like "I go to parties" and "I fuck so many bitches a day". I actually really love coding and most of the time in my house i code because my parents do not let me go outside to because they are over protective. I learned most of my skills by myself, so I developed many programs and started many websites. For, example I created a

hack for a game called Combat Arms and I ran this project for about 2-3 years and I am still running it. I love coding, graphic design, and much more. I know my life is not that interesting and maybe you are bored, but this is who I am.

Some of my products:

My hack for combat arms : <https://i.imgur.com/Efe7p67.png>

My hack for battlefield play4free : <https://i.imgur.com/ZTCE48i.png>

My DLL loader (Fully Protected) : <https://i.imgur.com/LSDtNnC.png>

I own stagestresser: <http://stagestresser.com>

SMS Bomber & Email Bomber Project (Custom Coded):

<https://hackforums.net/showthread.php?tid=4221419>

No Effort - June 6, 2014, 4:22 pm

Good luck to all that enter, remember, try to make your application stand out for a better chance of getting accepted, thank you for applying!

Regards,
Iconic ?

Name: 'Vin

Age: 15

Gender: Male

State/Country: Norway

Time Zone: GMT +1

Explain, with detailed examples, what your skills are: My skills are mostly within marketing, and customer support/help. What I mean by saying this is that if I get a customer to purchase something from me, I'll make sure I'll see this customer again, on my newer project/product. I got some skills when it comes to fitting what people likes to see & purchase.

Why do you personally feel you deserve to and should be chosen?: I feel that I would be a good suppliment for the whole group, and that I could share my thoughts, words and methods to make some gains.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I've recently started marketing, but I've currently been doing alot of 'currency-exchanging' & I also have an Ebook. Some threads:

<https://hackforums.net/showthread.php?tid=4259782> ,

<https://hackforums.net/showthread.php?tid=4246585> ,

<https://hackforums.net/showthread.php?tid=4264819> - Got more, and more will come!

Anything else you would like to say: I would love to join this group, and I am willing to share everything I know about marketing and other topics!

Best Regards,
'Vin

Tirus - June 6, 2014, 4:54 pm

Name: Vapor

Age:19

Gender:M

State/Country: Florida

Time Zone: UTC-05:00

Explain, with detailed examples, what your skills are: I know C, C++, Python and PHP.

Why do you personally feel you deserve to and should be chosen?: Because I believe I am intelligent enough to be in this group and I believe I'd fit in nicely in this group and make new friends.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I am 19, I am a developer, I mainly code in C++, although I do know C, Python and PHP. I am learning more and more everyday and my intelligence keeps growing, as I like to think. I have been on hackforums for nearly a year and haven't applied to a group yet because I haven't found a group that I truly like, although I found this group a few days ago and I really like it. I'd love to join the group and be apart of The Empire

Anything else you would like to say: Pineapples

Light that Blinds - June 7, 2014, 8:37 am

[img]<http://imagizer.imageshack.us/a/img90/6030/bannermo.gif>[/img]

Name: Jack/Kiosi

Age: 18

Gender: Male

State/Country: GA/USA

Time Zone: EST (GMT - 4:00)

Explain, with detailed examples, what your skills are: I am a graphics designer, web developer, and I have a bit of marketing knowledge. I have been designing for about 3 1/2 years now, and feel that I have a lot of experience with Photoshop that many other applicants do not have. As for marketing, I do not do marketing professionally or anything, however I know how to advertise products and such. Having sold almost 5 eBooks each receiving \$500 or more in sales, and thus I feel that I have a pretty good knowledge in marketing. Web development is still something that I am learning, but depending on what type of website is needed, I most likely will be able to fulfill the customer's needs! I have created only basic websites from scratch, however I have made many community

forums and gaming websites in the past.

Why do you personally feel you deserve to and should be chosen?: I feel that I should be chosen to join Empire because I have a lot to bring to the group. With my experience in Photoshop and Web Development, I can help other users out, and create great designs to represent the group! Not only do I have a lot to bring to this group, I feel that this group has a lot to bring to me. Many of the users in Empire I look up to, and because of this, I would love to join so that I could learn from them. Some people may not have the experience and knowledge that I do, and I could help them and teach them so that they could, one day, teach others!

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I am an 18 year old student that will be attending college in the fall. Since I was a little kid, I always loved art and wanted to make art. Unfortunately, when I was young, I was terrible at drawing and such. However; when I was 15, I started messing around with Photoshop cs5 and found that it was fun to make things on Photoshop! Everyday, I would try to create new pieces of art, as I liked to call them. I then got into the YouTube designers industry, and started my own YouTube channel, and make speedarts and photo manipulations. I got into some big clans, some of them exceeding 10k subscribers. I made graphics for some of the biggest YouTubers, and had a great time while doing so.

Then, I started to play Minecraft, I think we've all been there, and I found it to be a lot of fun. I would go on my favorite servers, and see that they had no website/forum, or the one that they did have some complete trash. I would ask if they wanted a new one, and of course they would say yes, so I started to make websites for the Minecraft communities. Eventually people started contacting me saying they would pay for me to make their website! Of course I agreed, I mean who would turn down money? So, then it started becoming a thing to ask Kiosi for websites for your Minecraft servers. Unfortunately this all stopped (for the most part) once I left Minecraft as I found different games that were more appealing to me at the time. Once I left, I found HF and started making graphics in the "Free Graphics" section. This is where I really started to learn from other members and their wants/needs!

That's most my journey in becoming who I am today as a designer, and I feel that i've come a long way since I started making random "artworks" in Photoshop cs5!

My portfolio: <http://minus.com/m0bGqaakrbNSo>

Anything else you would like to say: If I am not to be accepted, I understand, and maybe the next recruitment i'll get in! ?

I also made the HF userbars!

Captan - June 7, 2014, 3:26 pm

Some other GFX examples:

Explain, with detailed examples, what your skills are: Well I can code, I made some websites, I made some applications including AyoCrypter -> [LINK](#) which currently I am re-coding. I made a nice working eBook, look signature.

Why do you personally feel you deserve to and should be chosen?: Why I want to be in the amazing empire? Simple, there are tons of people in it with great knowledge in developing and designing and some are just clearly smart. I hope that these people can teach me stuff and that one day I might teach others, we can help eachother in coding and such.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

Well an example would be my crypter: [LINK](#) and I have made tons of others off-hackforums on other sites and such, I used to be a game hacker, hacking games and selling their cheats for money. Now I want to focus on coding, and earning money. Also take a look at my eBook which proves to be one of THE best on HF.

My coding skills started developing when I was 12 years old and had a shitty computer with internet access, I was fascinated by all the stuff that could be done, and now... Now I'm here.

Anything else you would like to say: The Empire is the best!

vitafortis - June 7, 2014, 8:07 pm

I just want everyone to know, I will know if you're lying. I'll be checking each application very carefully. Good luck to everyone.

Explain, with detailed examples, what your skills are:

I'm a programmer. I run a coding service (which has a 100% satisfaction rate so far) here:
<https://hackforums.net/showthread.php?tid=4143911>

I'm a problem solver. If I can't get something to function correctly or don't know the most efficient way for something to be done, I'll spend hours researching it until I find the best solution.

Why do you personally feel you deserve to and should be chosen?:
I've been looking for a place for myself on HF, and I think this will be a long-term solution.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

I've been programming for a while now. My motto is quality over quantity; I'd rather develop one great product than several low quality ones. I'm interested in cryptography and networking, although I'd realistically attempt to create anything I'd need to. I also don't pretend to be a big shot. Other people that may be applying for this lie in hopes of getting access, but will be removed as soon as they're proven as liars. I stay honest throughout my application.

Anything else you would like to say:
Good luck to everyone else, and I look forward to seeing the results!

Time Zone: GMT

Explain, with detailed examples, what your skills are: I am a skilled programmer and salesman. I practically live in the marketplace on HF, whether it be selling products, services or exchanging funds for users, I'm there, and I'm doing it right. I'm personable, with a good standard of English, and so I can communicate effectively on the forum with other users.

Why do you personally feel you deserve to and should be chosen?: I feel I'm an active, high quality member with a lot to offer the community, and The Empire specifically.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I have previously sold WoW game time here, which was my first venture into the marketplace. Once I realised the monetary potential of the HF marketplace, I quickly expanded into other areas. I have sold a successful eWhoring ebook, after securing the ripest of the fruit for myself. I made over \$700 off of that eBook in a month! Since then, I've gone on to provide social media services on the forum, and most recently I am using my reputation and the trust I have earned on the forum to operate a currency exchange service. Phew! Now that's a lot!

Explain, with detailed examples, what your skills are:

Mainly more html and etc, But I figured you want people of all calibers.

Why do you personally feel you deserve to and should be chosen?:

Well I think out of the box, I have a lot of free time and i'm just over all bored and feel as if I'm useful but not used.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

I have no clue how to fit in and exist on this forum haha, I really have no examples of anything or previous work so I guarantee

no one will add me, It's just hard to come up with stuff when i'm doing it solo.. if I had someone to chat with maybe I could get something done that's viable.

Br4v0 - June 9, 2014, 3:56 am

Name: Sahil

Age: 21

Gender: Male

State/Country: Punjab/India

Time Zone: +5.30 GMT

Explain, with detailed examples, what your skills are: Web Development, Web Designing, Photoshop are my skills. I am a freelancer developer & have worked on various CMS & have my own CMS.

Why do you personally feel you deserve to and should be chosen?: I believe if i am chosen for this group, may be i can help some members related to development & yea i can learn something new from current members of this group. So knowledge exchange is my motive.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: Currently i am working as a freelancer web developer & web designer. This is enough for month's revenue. These days i am planning to learn Laravel & develop some project in this framework. Sometimes i am also intrested in graphic designing. Mostly i do graphic designing for my own websites & client's websites like : logo , signature etc.

<http://idonate.geektweakz.com> (In Progress....)

Anything else you would like to say: This will be my second group on HF if i got accepted, first one was Rat's Crew :)

Bag - June 9, 2014, 5:54 am

Name: Boss

Age: 20

Gender: Male

State/Country: California

Time Zone: PST

Explain, with detailed examples, what your skills are:

I am a developer. I focus mainly on web development. Not that sissy static html shit but full blown

web applications backed entirely by the mean stack. I have build everything from iPhone apps to full blown bitcoin gambling sites. I'm not going to write much in this application because I'd rather you just view my works. I feel what I have actually done is a testament to my value not some BS'd application selling myself for a userbar. Please review the links below. I hope they will be enough for you to really consider this application:

<http://www.gagebachik.com/profile/>

<https://github.com/gbachik>

<https://itunes.apple.com/us/app/battle-f...?ls=1&mt=8>

<https://itunes.apple.com/us/app/2048!-ar...?ls=1&mt=8>

<http://duelbits.com>

<http://soldfy.com>

<https://www.coincashcard.com>

(This one has had mad hype and even made hacker news)

Why do you personally feel you deserve to and should be chosen?:

I feel I could be a great addition to the group!

I can provide unique perspectives on solving problems that you won't find anywhere else. Beyond that I love taking on new projects, and when I set my mind on something I stick to it until finished! These two things combined will allow me to really help out other members in the group with whatever they are doing as well as setup the right people to finish whatever they are working on. I hope the members of The Brotherhood will benefit from all my knowledge and info I end up posting in the subforums!

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

I was a business major at the University Of Arizona.

Now I'm attending a programming bootcamp in Colorado to help start my own company. I'm not really good at talking about myself, but if I did say one thing its that I'm a jack of all trades. I have no talent that stands out above the rest, but more of a general knowledge that allows me to combine different perspectives on many things.

I believe my earnings are proof enough of that.

Anything else you would like to say: I Am A Boss

Patrick Star - June 9, 2014, 7:05 am

Name: Tim

Age: 22

Gender: Male

State/Country: New Jersey, USA

Time Zone: Eastern Time Zone (UTC-5)

Explain, with detailed examples, what your skills are: My skills mostly fall within the HTML and CSS range but I have been introduced and have worked with Java, JavaScript, Python, and Visual Basics. I have used these skills to put together successful projects and forum communities based around video gaming.

Why do you personally feel you deserve to and should be chosen?: Personally, I feel I am a well respected and knowledgeable person in a lot of fields. Though I am not saying I know everything, I

believe being accepted will allow me to have the opportunity to learn a lot and that's what I'm looking forward to the most.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I'm a recent college graduate with a degree in Digital Forensics. I played baseball throughout my whole life and through college. Being an athlete has been a great experience in my life. It showed me that being a hard worker really does pay off and I carry that over to my programming and work life.

While working hard, I carry myself in a very professional manner but I can also be relaxed when the times are right. I've been condemned for being able to run communities in a very respectable and professional way while making them fun and exciting.

Anything else you would like to say: The main reason I am applying is so that I have a focus and a 'job' to get me to learn and become fluent in programming languages. As I said before, I am by no mean fluent in programming languages but I do have some experience.

Thank you for reading my application and good luck to everyone else who applied!

Cyber Saint - June 9, 2014, 7:19 am

[img]<http://imagizer.imageshack.us/a/img90/6030/bannermo.gif>[/img] Name:

My name is Cyber Saint.

Age:

17 years of age.

Gender:

Male

State/Country:

Canada

Time Zone:

Eastern Standard Time

Explain, with detailed examples, what your skills are:

My skills are primarily in programming. I am fluent in a variety of programming languages including C++, C#, Python, Java and VB.NET from years ago. I have a passion for programming and I am a consistent and of course, a passionate programmer. I am also an Android developer and I can fluently write applications for Android that function well with little bugs. I have been interested in programming since a young age. Before programming, I started off with markup, HTML. From there I learned CSS and JavaScript, so of course, I also know web development and design. While I don't do web design as much as I did when I was younger, I still consistently love anything that has coding involved, and that is why I am nowadays working with HTML5 and CSS3, which if you don't know are modern versions of HTML and CSS. HTML5 is great and brings so many new things to the table, but I'm not going to get into that.

Why do you personally feel you deserve to and should be chosen?:

I personally feel like I should be chosen because I feel like I have an excellent skill set. I am a passionate programmer like I stated previously and a very calm and intellectual person. I enjoy being in groups as well as teaching new things. If someone in The Empire wished to learn programming, all they would need to is ask. The Empire seems like a very close group of many members and I think I would be a great addition to the group. While I am relatively new to the forum, I have gained great knowledge and brought great knowledge to the forum at the same given time. I am a passionate member of the community, and if accepted - I will be a passionate member of The Empire here on Hack Forums.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

Why, hello there, my name is Cyber Saint. The name given by my parents is Ty and I live in Southern Canada and have been learning computers with a great passion for a very young age. I joined Hack Forums in January 2014 and have been passionate about it ever since. I have been programming in a variety of programming languages and today I am going to be showing you some of the work I have done in C++ and C#. The screenshots and a short explanation of what each application does can be found below -

An anti virus software that I am working on updating the threat database for - <http://prntscr.com/3qewyt>

This is an application I made a month ago that searches for things like Adware, Junkware and deletes it all. <http://prntscr.com/3qexe4>

A server sided report system for my school - <http://prntscr.com/3qexqy> that I made about a month ago.

I have designed and developed a variety of other software, but like I have said for applying for other groups, this is what I have on this system and I will be developing more later on to contribute even more to the group if needed. If I can gain access to my old desktop computers hard drive, I can share more of my software, hopefully this will be enough to join The Empire, however.

Now to get on to some more information about me, I am a simple teenager and I do consider myself to be a very tech oriented person. I understand responsibilities and I am always ready to follow through with them regardless of the case. I am passionate about everything that I do and I am a very calm and friendly person. I would work well with everyone in The Empire because of my passionate social skills like caring for each other and helping each other in the group in need at the same time as doing so. I'm Ty and if you need any more information about me to be accepted, please let me know.

Anything else you would like to say:

This looks like a great group and it would be an honor to be accepted.

Oak. - June 13, 2014, 6:45 pm

Name: Matthew

Age:15

Gender:Male

State/Country:Pennsylvania, United States

Time Zone:UTC-5

Explain, with detailed examples, what your skills are: My skills are mostly social, I am a very social person and that is what I use to an advantage. I also like to make money so I try to find ways to make money all the time. I search the web trying to make money a lot. I have published two ebooks on some methods I used to make money, I have gotten some good feedback on them as well.

Why do you personally feel you deserve to and should be chosen?: I feel like I should be able to join the Empire because I would be a great addition to the team. I am always eager to learn and I

would try to teach people in the group what I know. You would gain a very trustworthy, loyal, & active member as well.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I am a 15 year old kid that started out lurking on these forums learning stuff time and time again to a kid who wants to earn money and learn as much as I can. I try to soak up as much information as I can in a day from this website. I have made a lot of money learning stuff from this forum and picking it up and creating my own methods. I have written eBooks as well to give out to other members that work 100%.

<https://hackforums.net/showthread.php?tid=4267658>

<https://hackforums.net/showthread.php?tid=4282297>

I would like to join some people to continue my journey on hackforums.

Anything else you would like to say: If you have any questions, feel free to message me on here or on my skype at matthew.sylo

Vince - June 13, 2014, 6:56 pm

Good luck to all the applicants. I've been apart of The Empire before and they are a quality group, so don't miss out.

Yagami Light - June 13, 2014, 7:34 pm

Name: Fernando

Age: 21

Gender: Male

State/Country: Philippines

Time Zone: +8 GMT

Explain, with detailed examples, what your skills are:

Online Marketing I've been doing CPA, PPD and affiliates online, This is how i live.

SEO I've been a part of SEO Service before so i knew some effective way of getting rank

Coding PHP (I'm Still noob in PHP but been hoping to learn more)

Javascript (Script Kiddo)

CSS (I am not a good designer but atleast i learned how to do things i wanna do.)

Why do you personally feel you deserve to and should be chosen?:

I've been a member of HF for lots of years, Posted several useful information's, shared ideas and helped some fellas. In short Ima Good Guy!

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I am Fernando from Philippines, I've been a member of HF for several years.

I spend most of my time on section "Money", i don't have much friends on HF because i don't really post useless stuffs.

My Recent Project is <http://streamtuner.me> and still workin on it.

I have my working on this until now. Hoping for a big success :)

Anything else you would like to say:

I don't have friends on HF, Can you be?

MARVID - June 14, 2014, 2:20 am

Name: MARVID

Age: 23

Gender: Male

State/Country: USA

Time Zone: Eastern Time

Explain, with detailed examples, what your skills are: I can code, C/C++/Assembly/AutoIT/Delphi/VB6

Why do you personally feel you deserve to and should be chosen?: You are looking for native coders/programmers I can do this.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: Well there is isn't much to tell. I sell a crypter here on HF which has been up for over a year. I coded a lot of products for different members which should remain nameless. (Since they take credit for this work.)

Anything else you would like to say: Said everything I needed to say.

Justin Timberlake - June 14, 2014, 7:29 am

I would've loved to apply, but I'm not much of a marketer or developer. Guess I'll have to wait until the next general recruitment.

Atom™ - June 14, 2014, 8:03 am

Name: H\$N / Rookie

Age: 17

Gender: Male

State/Country: India

Time Zone: +5:30

Explain, with detailed examples, what your skills are: Graphics Designing & Basic HTML/CSS coding. I have been doing designs for around past two years, but I still have lot to learn. Also, I have been learning HTML/CSS and plan on learning lots of more languages soon. :)

Why do you personally feel you deserve to and should be chosen?: I really haven't thought about what I "deserve" as it mostly depends on what I contribute that in return comes back to me. If I was given a chance, I'd obviously pick Graphics Designer as that's what I do the best as of now. People might say I am the best or anything like that, but really, I am not. There are lots of people who are 10x better than me, you just have to find them out :)

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: Name's Hassan, but call me H\$N [pronounced HSN]. I'm a student by day and a freelance graphics designer by night. I like to be optimistic and try to never give up, :p . I'm open and try to be level-headed at all times, but sometimes I do burst up.

My works are displayed on my portfolios, @ [Minus](#) & @ [Behance](#).

Anything else you would like to say: I'd like to clarify that I am applying to join Empire mostly so that I can learn new stuffs, meet new & cool people and make more friends. The money/earning thing is 2nd on my list. Feel free to hmu if you want to chat, need help or anything, I'll be glad to help. That's all.

Thanks for reading my application, ?

- H\$N

Rathz - June 14, 2014, 8:15 am

I think I will be applying soon, reserving this post for the application.

Kung Fu Kenny - June 14, 2014, 4:17 pm

Name: Tom/Panda

Age: 16

Gender: M

State/Country: VA, USA

Time Zone: EST

Explain, with detailed examples, what your skills are: I am a graphic designer and have been for about 4 years, I can make most types of design but specialize in 2D (Non animated) and LowPoly work. My LowPoly work is usually scenic while my non animated 2D work is either photo manipulations of ideas I thought of, youtube banners, thread designs, website designs and much more. I feel like I can bring a lot to Empire :)

Why do you personally feel you deserve to and should be chosen?: I can do almost anything I can set my mind to, I am well mannered but like to have fun occasionally, also if anyone needs a design and I am available, they can hit me up and I will do it.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: Well my computer is getting fixed at the moment so my port is here:

<http://bypanda.carbonmade.com> , I am very passionate about designing, I am already looking into colleges for design and architecture. People who know me would describe me as polite, funny, intelligent, and I like to be noticed. Every day I balance hanging out with friends, school, and designing.

Anything else you would like to say: Thank you for taking the time to read this, hope I can be apart of The Empire! ?

neightworks - June 15, 2014, 1:15 am

I'm sure a few of you remember my application, remember to go all out if you really want to raise your chances.

Stapleton - June 15, 2014, 2:31 am

Name:

Jack

Age:

17 Years Old

Gender:

Male

Religion:

Catholic

State/Country:
United Kingdom

Time Zone:
GMT London

Explain, with detailed examples, what your skills are:

Web Designing and Programming is something I enjoy. In my short tenure of being a HF Member, I've helped multiple users with MyBB, as well with advice. Coming to MyBB, I have a very decent knowledge of coding in MyBB. Some of my works can be found below. In addition that, I've experience in Coding with phpBB, SMF & IPB. I'm good at fixing and patching vulns. I have experience with server management as well other coding languages like SQL and css.

1. <https://hackforums.net/showthread.php?tid=3893914>
2. <https://hackforums.net/showthread.php?tid=3902322>

My hacking skills are related to Website Hacking. I started learning how to exploit SMF 1.0 Boards via old, unpatched bugs and the first SMF Website I had defaced was a Gaming Forum. Shortly after that, I learned to use vuln scanner to add with SQL Injection which I used with vBulletin Oday exploits. It was fun to run scripts to make Admin accounts. And, I had some experience in defacing MyBB sites via Template Vulns which allowed to execute php scripts. I did it for non-harmful uses.

Coming to Graphics, I've to say that I'm not an expert but I like learning. The only thing I'm good is with making signatures. I started with making of Gaming sigs. I usually use Photoshop CS. I've learnt a few things like Abstract Art, Vectors, Air Brush Art, Doping and Transparent background making. Some GTA Sigs I made below:

Spoiler ([Click to View](#))

Computing and Hardware are another of my favorite subject. I like knowing more about Hardware, Setups, Programs, Builds and Interior. I used to dismantle my CPU and take a look at things and fix them back. I've even modded Windows XP, tweaking shells and patches with self extracting I386 Components

Which section are you most active in and why?

I post in the L33T OT section, Group Subforums, Webmaster Section & Lounge Sections frequently because I enjoy talking to people in the Upgraded Members Lounge. I find the people in that section

very friendly and willing to help out.

Why do you want to join The Empire in particular?:

I would like to join for numerous reasons, one being, Empire is one of the largest, most high quality groups on Hackforums, if not one of them, and then it's the most high quality. Empire is very appealing to me. The group is very well organized and I see you guys only let in very few members and those few members are very high quality. The output of this group is amazing, I see such good quality posts and contributions coming from the group, I have seen discussions around the forum from Empire members and it's mostly meaningful, high quality, or serious posts, none of the garbage that other users post.

Why do you personally feel you deserve to and should be accepted into The Empire?:

I think I would be a valuable asset to the group simply because I'd like to learn and share. The Empire is a great group and accepts potential candidates. I think I'm potential as I try at my best to help and learn at the same time. I've vast experience and I think I could help with my above skillset and get to know people by representing The Empire.

In one to three paragraphs, tell us a little bit about yourself personally or possibly something quite memorable that happened in your life, or an explanation of what makes you who you are and who are you:

I'm an average 16 Year old guy, just like most students of my age. I'm passionate about Computing, Movies, Soccer, Cars, Military Planes, Thermodynamics and Advanced Wave Communication Technology. I spend time browsing Hack Forums & listening to Last.fm.

Who doesn't play games? I have a PS3, PS2 and Xbox. I not only game, but mod games on consoles. Cheating is the best part about gaming.

My games:

Forza Motorsports 2,3
GTA San Andreas/SA:MP
GTA IV (Episodes Disk)
GTA V/GTA Online
Call of Duty BO2
Modern Warfare 3
Black OPS
Call of Duty 4
Halo 4
Halo 3
Counter Strike GO
Midnight Club Los Angeles
Need for Speed The Run
NFS Most Wanted
Need for Speed Carbon

Team Fortress
World of Warcraft

And, I hope to be a Tele-communication Expert in future and work under the wing of a good company.

Where do your priorities in life lie? What is most important to you?

Priorities? My real life comes first for me. What everyone wants is a degree from a good university to pursue a career. I want the same. I hope to be a Tele-communication Expert in future and work under the wing of a good company. Besides that, I'd like to purchase my own dream car which I always aspire of. Moving out of the city is my first step to it.

What caused you to stay active and be part of the community on Hackforums after first joining?

The community is great as a whole and most people I've met on HF are friendly and willing to help. The day I joined, I got a warm welcome and everyone pointed me to the right way. Unlike most forums, HF has an active community which participates in discussions and the best places to lurk for me are the Lounges and SRPP section. I was tempted to upgrade, so I did upgrade to L33t. I enjoyed each and every feature L33t had to offer, although I got denied for Ub3r weeks back. I mostly spend my time in Webmaster and Upgraded Sections.

Anything else you would like to say:

I would like to be apart of The Empire. I feel like I could learn a lot from the members and hopefully teach them some of the things I know. I would love to be able to talk in the sub-forum. Thanks for taking your time to review my application.

Skitz - June 16, 2014, 5:31 am

Everyone should take advantage of this, working with Tibit is amazing!

Skylar™ - June 16, 2014, 8:15 pm

State/Country: Pennsylvania, United States

Time Zone: (UTC -5:00) Eastern Time (US & Canada)

Explain, with detailed examples, what your skills are: I have a little over three years of experience in graphic design. I have over a year of experience in VB.NET and C#.

Why do you personally feel you deserve to and should be chosen?: I feel like I deserve another chance. I'm a lot more active now that I have summer vacation and I really regret not doing a lot for The Empire when I was in it. I believe every deserves a fair chance to join and probably deserve to join more than me since I've already let you guys down once. Anyways, If I do join back I plan on re-opening my free design service and changing my policy to a 1 week maximum for designs to be delivered.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

As most of you already know, my name is Chris or Christopher. I've been a computer geek for almost 12 years now and in those 12 years I've learned most than most 15 year olds can even begin comprehend. Well maybe I'm over exaggerating a bit.. However, I really have learned a lot. There are few fields that I'm more experienced in than others such as marketing, coding, gaming but above all, graphic design. I have roughly 3 years of experience in digital designing programs such as Adobe™ Photoshop and Maxon™ Cinema 4D. Learning these programs have been really frustrating and exciting at the same time.

Now it's become my main source of income and a lifestyle.

Anything else you would like to say: I just want to close off my application with another apology for not showing my worth when I was recently in The Empire.

Kakuzu® - June 18, 2014, 3:09 am

Name: Matt

Age: 17

Gender: Male

State/Country: United Kingdom

Time Zone: BST

Explain, with detailed examples, what your skills are: My main skills include: HTML5/CSS3/Javascript Website development, good communication skills (Live support for MCalts.com), 4 years experience of Photoshop and vectoring.

Why do you personally feel you deserve to and should be chosen?: I personally believe I should be chosen because of my work ethic. Once I've started something, I will finish it as quickly and as perfectly as I possible can down to each detail. Also my lack of desire for money. I am happy to give out designs and work the The Empire for free with no catch.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I'm a pretty relaxed, layed back guy (Except when it comes to work) that never looks for trouble or starts it. I don't have much of a portfolio as I've never really had many people to work for. However, I do have some if you require it.

Anything else you would like to say: One final message is that I have JavaProphet (Ub3r member) which will vouch for me highly as I am considered an asset on his team.

b?xxy - June 18, 2014, 1:58 pm

Name: I am BlackVeilBrides

Age: Seventeen

Gender: Male

Time Zone GMT - 5:00.

Explain, with detailed examples, what your skills are:

I am currently learning some java based coding. I am using my Minecraft Server that I will hopefully

be releasing soon as a sort of a sandbox to test out my coding. I am hopefully going to be learning more of the other codes along with more java based things like C+/Python/Etc. If you would like I could show you some of the things that I have been working on the past few months, I am a little further in java than being able to have the computer print "Hello World." (Jokes, I am a lot farther than that) I'm right now taking a basic class on Java, hopefully to fill in the little technical holes that I might have missed. I would like to be able to code things to a point where I do not have to look at a reference chart with prewritten code to help me. I would like to be able to get to the point where I can write things on my own.

I am also beginning on working with GFX. Mostly hand drawn stuff, that I am going to start implementing into Photoshop by scanning things into the computer with a scanner. I am currently doing some GFX work in Photoshop, and a little bit using Gimp. I know I am not the best but I am dedicating my time to it and will be providing some work in the near future.

Why do you personally feel you deserve to and should be chosen?

I don't feel like I deserve this position simply because I don't that those are the right words that apply to my application. I feel like I work hard enough, and that I am basically dedicated enough to all of these things because of my time set and my knowledge base on these things. The fact that I have a lot of time on my hands to dedicate this means that I can expand my knowledge and possibly help other people expand their knowledge by helping them better themselves with the knowledge I have.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well

I am currently a Senior in High School (When school gets back in). I love to do many things, and I am often told by people that I have many talents. This is great, but, it's hard to find something and utilize it to something that I want to do for a living. I'm a pretty out there person, and I am strong on my beliefs (I'm not much of a religious person, but I have morals). Music is life for me. I am currently in the process of writing some things, hopefully going to release them in the future. I have always loved skating as well. Skating and music mixed together is the perfect combination. I would love to tell you more, but I am sure that you will learn more about me if I am accepted into this group. I am an open person, and really easy to talk to so if there is anything you need regarding emotional/people help, you can always come to me.

For my previous works, I would like to not provide any simply because I am working on new things (Coding/Art wise). My Minecraft Server (Which I am releasing today actually). If you are interested, I could show you some of the things that I have been doing. I am working on coding my first plugin, but right now, I am working more towards modifying other plugins, customizing them to fit the needs of my server.

Anything else you would like to say:

I would like to say that if I am accepted to become a part of your group, that you will not be disappointed. I have been wanting to be a part of an amazing group like Empire for a while, and I would be thrilled and honored if accepted. I know that might sound weird, but I really take pride in these things, and I take these things really seriously. Also, since you are here, reading this application, I wanted to take this time and thank you for making it this far and reading/considering my application.

Thanks again,

BlackVeilBrides

?OPTIC - June 20, 2014, 4:48 pm

Hey Tibit when is this application thread going to end. Sorry.

Vxncent - June 20, 2014, 7:49 pm

[img]http://imagizer.imageshack.us/a/img90/6030/bannermo.gif[/img]

Name: Vincent Kaye

Age: 15

Gender: Male

State/Country: Adelaide, South Australia, Australia

Time Zone: ACST

Explain, with detailed examples, what your skills are:

Firstly, I would like to start off by talking about my previous experience with front-end designing. I have been designing websites with HTML and CSS for over 2 years. I am able to build from scratch, or with a CSS foundation such as Bootstrap. I am also able to make designs for Joomla! and WordPress. I would now like to move on to my Graphics. I can make thread designs and logos and would be willing to do this for free for any member of the Empire if they need it. Last but not least, my social skills. I am able to communicate to people online and offline and can socially engineer someone into believing in what I say. For example, I socially engineered my Religion teacher at school into agreeing with me that 99% of the bible is bullshit. I believe these skills could be useful for The Empire.

Why do you personally feel you deserve to and should be chosen?:

I feel that I should be chosen for many reasons. Firstly, because of the skills I just stated above, which might come in handy in the group. Secondly, I am looking for a group to join and The Empire looks like an A+ group that I am very interested in. I also believe that I should be accepted into The Empire because I would love to get to know the users of this group better. They all seem like nice lads/lasses and I think I would be able to make some good friends amongst them all!

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

I am a 15 year old learning web developer and designer from Australia. I have a passion for detail. I also love the new Flat/Metro UI, and I now base all my designs on it unless otherwise asked by the customer. If you need some of my private examples of work, I am free to chat via PM or Skype. I am currently a student in grade 10 of the 12 grade schooling system in Australia, and plan to continue onto University to study most likely Computer Science and get a job in the IT department. I think The Empire would help me with this.

Anything else you would like to say:

I would just like to finish off by emphasising how great this opportunity is for me to join a group. The Empire looks like it has a very bright future and I would be astonished to play a part in it!

Peter DragonSlayer - June 21, 2014, 4:10 am

[img]<http://imagizer.imageshack.us/a/img90/6030/bannermo.gif>[img]

Name: My name is Andrew Limey. However, I'm Simon in real life :)

Age: I am 16 but turning 17 in 3 months.

Gender: Male

State/Country: I live in Denmark a nice country where we eat lots of strawberries.

Time Zone: GMT +1

Explain, with detailed examples, what your skills are: To be honest I am still in the process of learning development. I am in the process of improving my C++ and C programming language. However I'm quite decent at markup languages like HTML and CSS. Currently working on my own website and my first game. I have a big knowledge around computers and technology and I can easily help with a lot of different problems. I used to be gaming a lot and got maxed on Runescape. I also got to Diamond 1 in League of Legends.

What I believe The Empire can give to me is to help me on the way to becoming a better developer, and hopefully I can give back very soon.

Why do you personally feel you deserve to and should be chosen?: I feel like I should be chosen because I am a very nice member and I never seem to get in conflict with others. I am a great person that usually fits into a lot of groups and I really miss that feeling of being in a group, in a big community. I'm very interested in learning new stuff and building some great friendships in The Empire.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: As I said earlier I am still in the early state of becoming a good developer, and therefore I do not feel like I have much to show. I just got done with my public school and I am having a long vacation where I will be looking to improve my coding skills. Next year I will go to college and after that my plans are to move towards becoming a computer developer or engineer.

Anything else you would like to say: Thank you for giving me this chance of becoming part of your group. I have been looking forward to this for a very long time :)

HIGH PAID FELLA - June 21, 2014, 6:15 am

I'm recruiting when I have my pc back.

Time? - June 21, 2014, 8:55 am

*My last post got messed up, so I deleted it and created this one.

Fa7e's recruitment audio recording: <http://vocaroo.com/i/s1pSPj3PNIFf> Name: Ryan, or Fa7e

Age: 16

Gender: Male

State/Country: Pennsylvania, United States

Time Zone: Eastern Standard Time

Explain, with detailed examples, what your skills are: I am not very good at creating GFx from scratch, but I am very good at creating thread designs using basic patterns. If you look at my sales threads you will see my past works. I am very talented in Visual basic and I am also very talented in Python. I can design websites and my organization is great. My main skill, though, is marketing. I have sold many things on many forums and usually manage to make at least \$40 on an average day. I can contribute to the group in any way, shape, or form.

Why do you personally feel you deserve to and should be chosen?: I take a lot of pride in whatever I do. With that said, I take a great deal of pride in trying to get into groups. I have never been in a group before, but I am not desperate to get into one. I will work to get into whatever group I please, and I hope that The Empire will be my group. I am a loyal person and I will do whatever it takes to contribute to the group. If I were to get into the group, I would love to be a salesman or someone who hosts the giveaways. I take time in making my threads as high of quality as possible, and I am never lazy in that category. I really want to be in this group, and to prove that, I have made an audio recording which can be found [here](#). In the recording I tell a little bit about myself as well as my skills. :)

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I am soon to be Junior from Pennsylvania, United States. I have been on Hackforums for 2 years and I have enjoyed every minute spent on it. I do not have a high post count for being on here for 2 years because I try to make my posts as quality as possible. I used to be extremely talented at Doxing, and I can still dox quite well with little information. I am a huge fan of making money. I love discovering new methods of making money. I have resold numerous products and I make a very solid money flow for only being 16 years of age. I have made a great deal of money through eWhoring, but now I am making money more "professionally".

Anything else you would like to say: It would be an honor to get accepted into this group. I have been working very hard on ideas for this application.

If voice application isn't your thing, here is my application in text.

Spoiler ([Click to View](#))

Hello,

I am Antigen, first of all let me talk to you about who I am and what I can do. Please note that, this is a long audio file, so if you prefer you can also read the same from thread.

I'm a 21 year old computer science engineering student from India. I do spent most of my online time in Hackforums.

I like programming, white hat hacking and money making(Although I'm just a wannabee online earner). I originally planned to use my own voice in this application but as you probably know I'm not living in a English speaking country, so I have terrible pronunciation and grammar, so I though I better use this online text to voice service, if you insist I'm happy to private message you with my own voice. I am a positive, friendly and optimistic guy, I do love making friends and spending time with them. I guess that's all about me.

Let's talk about my skills and knowledge. I'll start from my plus points to the areas I sucks most.

I do know to code in various languages, which are C, C plus plus, PHP, Visual basic and such languages. As a computer science student I do possess knowledge in many languages ranging from assembly to python. Aside from programming. I do have skills in hacking, well let's put it this way, I'm a white hat hacker who have knowledge in Sql injection, cross site scripting and such.

I spent my hackforum time in mostly helping out in Hacking section, computing section programming and now a days market section also.

If you wanted to see my important threads. please read below spoiler.

That's all about my positives sides.

Now let me say about my negatives, I am a total newbie in graphics even in paint(lol). Now you know why I haven't made glittering graphic application for recruitment, also I don't feel like copying others images and using it in my application thread to look more appealing. I do also sucks in money

making, may be because I am totally new to that area, but I have made decent money with adsense using my blog. I really want to make money and have passion for it, but I lack methods and knowledge in this field. I really want to improvise in this area and ready to work hard for it.

Now Let me say why I personally feel I deserved to be in The Empire, first of all I was in The Empire some time ago, I happened to made a mistake(in which I regret very most) which cost me my position in Empire. Me and xadamxk talked about this in some time ago and he said I can apply once again after re-organizing the sub forum and group completes. When I was in the group I really enjoyed the company of the people in Empire, I quickly made many friends there and I had long nights chatting in group Lounges. I really like the HQness and friendliness of the group and the knowledge members had. I remember the group and sf as it was in yesterday. What makes me deserves to be in Empire is my knowledge, attitude, hardwork and trust.

I can honestly say you can check my entire posts I had in Hackforums but you won't ever find any low quality posts or anything. If I get to be in Empire, I will try my best to make The Empire achieve more heights and support it as long as I can.

I sincerely thank you for reading my application, also my best wishes to fellow applicants.

Good day.

As a developer my finest work,

Spoiler ([Click to View](#))

Advanced Intelligent Virtual Assistant (AIVA)Recog voice and does things like Siri

SOS system (Emergency Response)

Explain, with detailed examples, what your skills are: PHP,css,html,java (learning) , c++ (learning), vb.net (learning)

Why do you personally feel you deserve to and should be chosen?: I think i can learn alot from this group and i can teach the other members maybe also something

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: Hi, i am helsink my real name is Anthony i love to develop games i made an ripped off MMORPG but it stopped i dont have any screens for it D: but i am currently working on desertboard.eu :)

Anything else you would like to say: no

Nasyr - June 21, 2014, 4:44 pm

[img]http://imageshack.us/a/img90/6030/bannermo.gif[/img]

Name:

John aka Nasyr

Age:

17-years-old

Gender:

Male

State/Country:

United Kingdom

Time Zone:

GMT / GMT +1 (Summer)

Explain, with detailed examples, what your skills are:

Digital Imaging & Website Development

Recently I just finished my first year at college doing this course and during it I done various classes all related to Website Design and Development basically, here is a list of classes I done and each class explained.

Application Package (Database)

In this class we were working mainly with Databases and understanding how they work, I knew a fair amount before walking into this class but I learned quite a lot of valuable information, this was for both computer based Databases such as Microsoft Access and online MySQL databases.

Computer Science

This class was mainly coding in various languages including Visual Basic, C# and C++ aswell as other smaller languages and also learning about how code can be different from what you see, such as drag and drop code and how that's actually made.

I believe from this class I got a good learning of coding and I never thought about the code behind drag and drop code.

Website Design and Development

In this class I finally got into what I love, web design, this class was perfect for me because we were told what to make and a due date, that's when I got into the code and it was the best part.

This class is where we began to code the website that we were given a brief on.

I had other classes but they were for Photoshop, Illustration etc.

I had three classes in the year which were making websites and those were the best.

Why do you personally feel you deserve to and should be chosen?:

Well I feel I could be a valuable asset to this group as the group could be to me, the way I see it is,

this group have Web Designers and Developers this gives me a chance to learn from them and for them to learn from me.

In addition I am extremely active in [Website Construction](#) where I haven't seen any Empire members active in there.

Also I made this thread [here](#), not a lot but it is something to note.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

About Me

Well as stated above my name is John, I am from the United Kingdom and currently I go to college, I just completed my first year at college doing Digital Imaging and Website Development, I plan to go back next year doing Networking and Support.

I spend a lot of my free time with friends, on Hack Forums and working on websites with/for friends and others who ask me.

Website Development

I have loved to make websites since I was around the age of 12, there was always something about the HTML that made me happy and it always made me feel calm when angry, as weird as that sounds, nothing beats making a website in my opinion.

I have created different websites for College, Family, Friends and Friends of Friends.

Forum Experience

Although this may not mean a lot to some forums mean a lot to me, I love forum websites but I haven't really found a forum I liked until now.

So I own a licence to I.P Board, vBulletin and XenForo but I carry 5 years experience with MyBB alone.

I have been running forums since I was 11/12 and I always seem to find myself becoming Administrator on forums I join, although I don't think I'll be Administrator here, I wouldn't accept it if offered due to the amount of work involved I couldn't deal with it, college and a job.

Anything else you would like to say:

Thank you for this opportunity to gain access to the exclusive club; The Empire.

I'd love to meet the members and also meet others who have the same interests as me.

I appreciate that you have taken the time to look over my application to The Empire.

Nasyr

Nerd³ - June 21, 2014, 7:18 pm

[img]http://cdn2.worldofminecraft.com/resize/remote/a85bca4804cdb321be35fd09ae2ab389-795x295.gif[/img]

Age: Fifteen

Gender: Male

State/Country: Connecticut, United States

Time Zone: Eastern Standard Time

Explain, with detailed examples, what your skills are: Personally, I consider myself very professional and polite. For general computer skills, I know how to run websites such as stressers, forums, resolvers, stores, and a lot more. I can also make PHP scripts for websites, virtual private servers, and any other kind of software that uses PHP files. During a transaction, I never turn down to my

customers, nor do I to anyone. I also know how to code basic programs in Visual Basic such as spammers, logins, booter clients, web browsers, and a lot more other programs I have made in Visual Basic. Many others consider me helpful, polite, professional, and friendly.

Why do you personally feel you deserve to and should be chosen?: I think I deserve to be a part of this group because I could always easily get along with everyone, I meet all of the basic guidelines and I will obey all of the owner's and the leader's rules they may have for being in The Empire.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well: I am a fifteen year old teenager and I have many skills based mostly on PHP Scripts and running advanced/basic websites such as stressers, forums, resolvers, stores, and a lot more. Some examples of my work would have to be websites that I've worked on and websites I was an administrator on. Website(s): www.deadlyfishesmods.com, and a few more domains that are not active anymore. I would provide pictures of my programs that I coded from scratch but they are on my older desktop. (If you want to see them, feel free to private message me)

Anything else you would like to say: I would like to thank the administrators, leaders, and the owners that are a part of The Empire for making it what it is today! I personally think it is an awesome group and I have heard many kind words about it. Thank you for giving me a chance to join The Empire!

Cristianantonuccio - June 22, 2014, 7:15 am

I could give help in this kind of operations
I hope you choose me as a new member!

Sorry for my BAD English

JumpWar - June 22, 2014, 11:35 am

Since part of what you are looking for is connected to the web I made a website for my application.

Website: [JumpWar](#)

For your convenience I will also attach a screenshot:

Spoiler ([Click to View](#))

And basic information for a quick overview:

Spoiler ([Click to View](#))

Name: JumpWar

Age: 22

Country, Timezone: Germany

Knows: Java, PHP, HTML, CSS, C.

Focus on: making usable products

I hope you have a great day ?

BoomShot - June 22, 2014, 3:27 pm

Name: BoomShot

Age: N/A

Gender: Male

State/Country: United States

Time Zone: GMT - 5:00

Explain, with detailed examples, what your skills are:

My skills are programming and marketing. I've created countless successful products (CryptME, FileGuardian, and EasyProtect) and continue to do so. I'm always striving to improve my products and myself. While doing this, I've learned a lot about myself and continue to find new skills to master. I'm ambitious and will always push myself to the limit.

Why do you personally feel you deserve to and should be chosen?:

The main reason is that I'm active. I'm very dedicated to HackForums, my products, the groups I'm involved with and I always find ways to improve in each of them. On top of it all, I care about helping others. For as long as I've been around on HackForums, I've been aiding other HackForums users and spreading my knowledge.

In one to three paragraphs, tell us a little bit about yourself and your previous works, show some examples as well:

I'm very ambitious and continue to surpass all my goals and expectations. You will always see me giving it my best and for as long as I can remember, I've been like that. My all time favorite hobby is programming. It's nice to occasionally hang out with others, but I mainly enjoy programming and continuing to exceed my own expectations. It's a non-stop cycle, but it's what I enjoy doing.

If you're not going to give it your all, then it's not worth doing at all. You should never do something that you don't enjoy or that you won't at least put forth the extra effort to do so. You always want to prove to yourself that you can do it. That's my mentality in every situation that I find myself in and it'll apply to being involved with the Empire as well.

Anything else you would like to say:

I'd like to be apart of the Empire and meet other members from the group. I'm always willing to adapt and share my knowledge with others.

Tibit - June 22, 2014, 4:20 pm

Closing this now. I've PM'd some applicants for more examples of past works, will look through those and choose some members for the product lines soon.
