Thread: [Reeper X C4D plugin Tutorial](#)

Loofah - June 3, 2014, 2:24 pm

Just realized this is in The Graphics section when It should be in the Tutorial section. I don't think it matters too much, but if someone can move it that would be great.

Reeper X Tutorial

\\ What you need

- Cinema 4D

- Reeper X plugin (<http://www.codeworkers.de/garage-plugins-reeperx.html>)

Basic knowledge of Cinema 4D

\\ Step 1

Make a Mo text in Cinema 4D by going to /Mo graph/Mo text
Customize your text how ever you want it.

[Image](#)

\\ Step 2

Select your text from the menu on the side

[Image](#)

\\ Step 3

Duplicate your Text. Take one of the text and press "C" on your keyboard. You'll end up with a group of things. I want you to open everything in it tell you end up with a coloured C symbol for all the letters.

[Image](#)

\\ Step 4

Take all the Letters out of the group. You can delete the rest of the group because you don't need it.

[Image](#)

\\ Step 5

Open Reeper X From going to Plugins/reeper X

[Image](#)

\\ Step 6

Duplicate the Reeper X for the amount of letters you have, then drag each letter over the Reeper X.

[Image](#)

\\ Step 7

Uncollapsed all the reeper x objects and then highlight all of them.

[Image](#)

\\ Step 8

You will then see that at the bottom right of you screen you will be able to edit your text.

[Image](#)

Should end up with something like this : <https://puu.sh/9dOSj/1e7ede1401.jpg>

All you have to do now is edit those values. Only edit the values under the general tabs. Dont touch Segments or mode.

Values I Suggest :

Radius - 2 - 5

Strand - 1

Coils - Play around with the Value tell you find something that looks good

Distance - Again play around with this Value

With enough tweaking in c4d and some effects from Photoshop I ended up with this :

<https://gyazo.com/701056201b388e8bd2b7807ff50d2219>

I tried to make this as basic as possible. Please note that this is my first tutorial so dont expect too much. If you have problems just make a post about it and ill try to help you. So if this is LQ. Might make a video about this but I don't have much time.
