Thread: [\[Tutorial\] How to get HideMyAss Proxies in IP:Port \(raw\) format. \(FREE/No Downloads\)](#)

Decim - June 3, 2014, 2:38 pm

[Video: <https://www.youtube.com/watch?v=NLgU0fyWT6Y>]

Link is in the video description.

You won't ever have to beg for proxy lists again.

Please like the video if this was useful, it helps me out a lot.

Thanks and good luck.

A lot of proxies I try to use are slow or either offline 99.9% of the time.

It's considered to be the best by many and I myself have had no problems with them.

Just showing you how you can get them for free.

Wow, thank you so much man!

Appreciate this!

Obviously you don't own it, I know that.

HMA isn't #1 though, I personally dislike it because everytime I try to use a proxy, it's offline or super duper slow.

Make sure they're all set to High/Fast.

It's what I do, maybe that'll help.

I see this section getting spammed with proxy lists everyday, can't imagine why.

teengt - June 5, 2014, 9:13 pm

Thank you very much this tutorial :)

Not bad this is a really good method compared to some that I have seen.

Red S?x - June 24, 2014, 2:08 pm

Awesome method to getting the proxies quickly. Just sucks that HMA Public Proxies never work for me, lol.

I've been using them for a couple of years now and I've had no problems.

They've changed their proxylist address to: <http://proxylist.hidemyass.com/>.

But the method is still the same, just follow the same instructions!
