Thread: [Best keylogger that's free and not detected?](#)

mcgamerx19 - June 3, 2014, 4:30 pm

Where can I get the best keylogger for free? And it cant be detected? Thanks.

BinaryCode - June 5, 2014, 10:20 am

OP, i would go with cracked Predator Pain v13, or if that's not your style, go with NetStealer. Search google for it, and click the first one. Not some shady link. If you want to talk about hacking with me, i can get you started :D

There is no perfect keylogger, always have to be used variously camouflage techniques, most cryptography.

lover2 - July 3, 2014, 8:46 pm

Theres a cracked galaxy logger try that one

unoquepasaba - July 4, 2014, 7:58 am

Could you provide the link? thx bro

Mr.Ze - July 4, 2014, 9:03 am

Predator Pain v13 is cracked and detected.
Predator Pain v14 however I do not know...

Ardamax Keylogger 4.2 is out there, yes, it's detectable, but it can be encrypted with almost any crypter and then it works like a charm.

Galaxy Logger & Stealer is fully cracked out there, however, I haven't tested it yet.

Just Google it, I don't want to get banned for publishing/commercialising cracked content.

Just a question since you like to know about the thread: What's better?

- a) RAT NO FUD or Keylogger NO FUD + good crypter
- b) RAT FUD or Keylogger FUD (without any crypter)

a) RAT NO FUD or Keylogger NO FUD + good crypter

b) RAT FUD or Keylogger FUD (without any crypter)

Always for full FUD (b).

Most of the crypters go from FUD to NUD quite quickly anyway.

Here is the deal: Not all RATs/Keyloggers work with all Crypters and vice versa. So it can be a profit but it can also be a waste of time and/or money. While if you know that RAT or Keylogger is FUD itself, you don't have much to worry about and you can avoid wasting more time and/or money to get a good crypter. Because crypters are here to primarily to turn NUD into FUD, while, yes, secondary task is to add additional features; but if you have a FUD RAT/Keylogger, I doubt you'd need that. So, I, myself, would always go for b) for the reasons above.

Gluteus Maximus - July 4, 2014, 11:35 am

I like the galaxy keylogger it works sleemlessly..... for me.

And do you know any RAT or KEYLOGGER (rats which include keyloggers are desirable) which had been FUD for a long time and still being? I'll purchase it immediately!!!

If you really want to jump on buying... Predator Pain v14 is good.

But I managed to get 2/40 (almost FUD) with Ardamax Keylogger + LaCrypt 2.0.

First try to look for free, cracked, leeched keyloggers, RATs and/or Crypters, if you can't get the desired effect, then buy it.

Cyber Seal is a great Crypter.

SOSA_ - July 4, 2014, 3:36 pm

? Make one. It's the best way?
