Thread: [Optifine cape checker/ minecon cape checker?](#)

EthanX - June 5, 2014, 2:11 pm

I've seen one on nodusgriefing like 2 years ago, but I can't find any that look safe. Does anyone know of one?

You can use the API on <http://checkna.me> . I know I saw a program around here, but I think the thread was removed for some odd reason

I know this is grave digging, but this is on topic, and it's not THAT old...

If anyone still wants this, here: <https://hackforums.net/showthread.php?tid=4294196>

can't someone just modify eggcrack a bit or a different checker and change where the API location is (replace the yggdrasil one with the checkme?)
