Should they be changed or left the same ?

I want optimum protection.

You can leave it the same. However I recommend another firewall. Avira isn't really prepared to have its own firewall.

**-RC2-** - May 23, 2010, 6:31 am

Would COMODO firewall be a better alternative ?

**Paradoxum** - May 23, 2010, 6:32 am

Yes. ? Or Online Armor. You may install Avira without the firewall.

kk, would it be enough to just disable it or would I have to uninstall it.

**Paradoxum** - May 23, 2010, 7:20 am

You would have to uninstall it. ?
