Download : <https://www.dropbox.com/s/wphxvmyiekz7mft/Proxy.rar>

Source VirusTotal : [>>>>>](#)

Project : Vs2012 Vb.Net / FrameWork 4.0

get helping ref url ;

Get Ip & Port code: <https://hackforums.net/showthread.php?tid=3163973&page=2>

Draw progressbar :

<http://blogs.gamefilia.com/btc/07-02-2012/48270/vbnet-dibujando-progressbar-en-listview>

add image to lv subitems :

<http://www.planet-source-code.com/vb/scripts/ShowCode.asp?txtCodeId=8823&lngWId=10>

Edited..

note : my english is bad ?
I'm learning

Server97 - June 6, 2014, 12:18 pm

3 posts, no thank-you. Get some more posts and then I'll trust.

sh@rp - June 6, 2014, 12:25 pm

Your english is bad I am sure.... like your way of coding.....

Really bad project content !

TO DO :

- Resizing the form and its controls
- Remove unnecessary features like : combobox, getimg and Test buttons... TextBox.....
- and so on

Good luck for future.

zyvox - June 6, 2014, 3:44 pm

I did download this, nothing fishy about the source code. Although I did get a lot of errors, however that is probably due to the conversion from your VB2010 to my newer one.

Nikola ?esla - June 6, 2014, 3:59 pm

Last post was posted like year ago and you have only 3 post & no rep
but i guess your bot is good :)

@wallace87000 Dude, Are you jealouse or just some kinda weird person that only knows how to criticise someone who has better coding than you?

So far No one has managed to Grab the Proxies from the new HideMyAss Website. And this Guy did it. Including myself. Befor it was much easier. Plus the way he has made a Module that make Images fit as Listview Subitems, is freaking awesome. I think not many could've done it. Including you. Now dont be critical of someone who just made a great efforts to show others his work. And yeh, I have seen your work too. They Suck BIG TIME. You should be supportive to new Members and those with less Posts.

@ctnTR, Thanks friend! I love the Regex and Scrapping method you have used. You done a very well job. Thumbs up

sh@rp - June 10, 2014, 10:05 pm

@Mikklo :

Should I be jealous loooool

Where are your development projects and contributions on this community ?

Since his last post OP implemented my reviews..... then I didn't want to get into this debate....you can't understand what are constructive criticism....

SIM-1847363 - June 11, 2014, 6:26 am

I like the ingratiation of the progress bar to see how strong the connection and the speed.

Very nice work with the sorting when you click the column.

I agree with you about the "Constructive Critisim"... But in this case that wasnt needed, "In my opinion"! I dont need to show my skills or do something SPECIAL just to be a part of the community.

I feel that every new member should be welcomed and others should be more supportive of their work. If you dont agree then thats ok. Everyone has their opinion mate. Thats all what I am saying.

You have to start somewhere.

You don't have many posts, either.

?????? - June 11, 2014, 12:29 pm

He included the source, you can just compile it yourself. Nice source!

mikrodotnet - June 12, 2014, 1:24 am

nice share, good job with the listview sorting

anihilator - June 12, 2014, 11:54 am

This is not working anymore since the last update, but if you know a bit of programming you can simply update it..

Nice share bro! :D

Hopsin - June 12, 2014, 11:56 am

Thanks for sharing this. It might come in handy!

Malcolm???????????????? - June 12, 2014, 12:10 pm

Sn0wX - June 12, 2014, 2:00 pm

what parts did you actually write though? Can you paste the methods you did :/

I'm amused to see a method i wrote a few years back, 2007 and was originally called ReturnAndAssignToDataStream. Iv seen it posted on here few times. Do any of you know what it actually does?
