I'm wondering to myself if you're actually serious about methods four and five.

Let me guess, English isn't your first language?

English was never my best language. I failed it and had to attend summer school for it. Also i did not learn English till i was about 7. Also the app i used to type it didn't have spell checking and i just realized it xD

As for the serious about them yes, and if you don't believe me i can provide you with picks of mine. I made about 80\$ the 23rd last month that I spent at repticon on 2 golden tegu's

Thats your opinion though, I have tried all of these and made my money back + some, thats why i list 5. I started with just the 1 and then i thought to myself " what if i did This" sometimes it would fail hard and sometimes it would be very profitable, So i listed my top 5 profitable ways. These wont guarantee 1000\$+ a month just some change to spend on the side.

Thats kinda why i only put it up for 1\$, I know these methods require a little bit of money, (kinda like other methods) so i dont want you to spend 20\$ on an ebook then have to spend 15 more just to use the ebook effectively.

The eBook contains methods that will work fine, although most will take quite a lot of work and require investments. If you are willing to work hard and invest then the eBook will be good for you.

In your opinion is it worth 1\$? :3 Also my theory behind chargen 1\$ is so you have that extra money to invest. Unlike some ebooks you pay 5\$ then still need to invest 50+ \$
