Thread: [Spotify Radio vs Pandora Radio](#)

So I want to know your opinions. Which is better? Spotify radio or Pandora radio. I purchased spotify premium and love the unlimited skips. Also, the song changes instantly unlike the lag in between on pandora, and it sounds clearer in my opinion. Anyway, leave your thoughts below on the two services.

I used to use Pandora radio all the time before I purchased Spotify premium. I really do enjoy the unlimited skips, every time you like a song on the radio it saves it in a playlist, and so on. I feel like Pandora gives you slightly better songs that relate to what you want, but I prefer Spotify way over Pandora now.

I'm pretty biased when it comes to my music. For me personally it's spotify. The above listed is very knowledgable but in the end it's personal choice and what your tastes are/ what you use and relate to better.

I used to use something called Senzari and it was amazing, but now it is no more. I prefer Pandora as my tablet let's me skip unlimited times.

I like Pandora better, however Spotify radio is nice too.

I have Pandora One and Spotify Premium. Each for their own time.

Pandora is better about introducing you to new music while Spotify seems to stay closer to what the station was created for.

So, whenever I want familiar music: Spotify; if I am a bit more of an adventurer that day: Pandora.

Pandora lets me find out about new music, but the quality is terrible. Spotify I use to play songs in my playlist (songs on demand).
