[img]<http://s28.postimg.org/b29rzq22l/Screenshot.jpg>[/img]

Q: What does this tool do?

A: It creates a Pastebin from a file and the stub downloads and executes the file in memory

Q: For what shall I use this?

A: Its a memory downloader that gets the file to load from a normal pastebin.

Q: I still have a question.

A: then shoot me a PM with your questions and i answer ASAP

Builder saves a file as crypted pastebin.
Stub downloads then decrypts and injects the file

Looks interesting, will maybe be taking a closer look once I see some review from the copies you gave out.

coolerfarmer - June 10, 2014, 12:39 pm

Its a downloader that doesnt use a free or paid webspace. It creates a crypted paste from the file and the Build file downloads it and executes it.

its not using base64 and its no NET dependency shit.

So... It encrypts & encodes a file, user uploads this to pastebin. Put pastebin link in your builder, build the downloader. When downloader executes, it downloads/reads the pastebin content, decodes & decrypts it, then executes it?

Angel Beats?? - June 10, 2014, 2:03 pm

Does this inject it into another process or does it drop it as a file and run that?

Chip Skylark - June 10, 2014, 2:05 pm

I do not understand what's the point of having a tool that downlaods text.

Why not just go on the site and dl it by yourself?

(Jun 10, 2014 02:03 PM)Snapchat Wrote: [\[CITE\]](#) Does this inject it into another process or does it drop it as a file and run that?

It injects the file. so it never gets dropped to victims hdd.

Because it is no normal text that u download... you hide a file as paste and the builded file downloads it then and injects it... You can download the paste manually but who decrypts it and injects it then?

Cibor - June 10, 2014, 2:36 pm

I think you should reword your thread (atm it's hard to read, at least for me) and put a bit more explanation on how it works, what it's for etc. As you said, a video would be very useful.

Angel Beats?? - June 10, 2014, 3:26 pm

Yeah, i changed the title to: Pastebin Downloader V1 | Download and execute files from Pastebin

Six-Nine - June 10, 2014, 3:45 pm

What exacly do you mean with "execute" from Pastebin?

There is nothing to execute? Its only text?

This tool creates a paste from the file you choose and the builded file downloads and executes the file... you can store a file and download it via pastebin.

I added a little FAQ and created a video. Video is uploading now i edit Mainpost when vid is up

Video Added to the Main post. I hope its now clear what this tools does and for what it can be used ;)
