Thread: [Pastebin Grabber](#)

CodeAssassin - June 7, 2014, 9:39 am

Hello All,

I seen a pastbin grabber made by someone else who wanted a PM for source (disgusting).

So I made one you can all have for free not obfuscated and ready to learn from.

hope you like it, a thanks is always appreciated but not necessary.

Pic:

[Download Source](#)

This is a source, so no virus scan..

EDIT: Multithreaded and events, basic webclient use (did not see a need for a full blown httpwebrequest). But it should be a good start for a new learner

Note: No error handling has been added (really) and basic regex skills, but if you learn from it, hopefully i have helped a little :)

CodeAssassin - June 7, 2014, 9:55 am

(Jun 7, 2014 09:49 AM)Spindriftmarch Wrote: [\[CITE\]](#) Downloaded it as i can't pm anyone anyway. A simple and amazing software at the same time really. Thanks.

No problems, also thanks for the kind reply :)

TheBarret - June 7, 2014, 10:23 am

Altho the app seems ok, its rly not effective. Why should i start another application ontop of my browser while i can do the same using my browser ?

Why should i start another application ontop of my browser while i can do the same using my browser ? Its a source to learn from nothing more, I would not develop a system like this for work, This is just for fun. If that's ok with you??

sh@rp - June 7, 2014, 11:16 am

thx...but....hummm lol

nothing to learn from, ...

Maybe not for you but I don't just code for YOU, thankfully :)

Pretty glad to as you seem very ungrateful!

t0rch - June 7, 2014, 12:09 pm

Thanks for it! I'll open it in .net reflector to check it out just to make sure ?

Cheers,

BinKill-Ethical ?

EDIT: Realized it was just the source ? I'll run a virus scan on the RAR and post it here ?

CodeAssassin - June 7, 2014, 12:11 pm

Most likely just a false positive. Thanks for the release OP ?

Cheers,

BinKill-Ethical ?

What's the point in scanning a compressed file?

DBots - June 7, 2014, 12:26 pm

You could be a little more organized. Other than that, good source.

Nothing noticeably wrong. Thanks for not requiring PM for source.

t0rch - June 7, 2014, 12:26 pm

(Jun 7, 2014 12:16 PM)Mr. Trvp Wrote: [\[CITE\]](#) What's the point in scanning a compressed file? People can attach 'hidden' files to RAR files. If he were to attach a trojan say, it would most likely be picked up in virustotal. Or so I'm told ?

BinKill-Ethical ?

Thanks, What would you improve if anything?

Any tips to make it better? Thanks again!

TheBarret - June 9, 2014, 6:48 am

jesus, is this a new trend or something??

Hahahha love this tut.

Probably THE best tut on HF!!

Psychogenic - June 9, 2014, 12:34 pm

No offence but you used someone else's source to skid this grabber, and you're just releasing that source under your name? That's bogus, my friend.

Lol you dont know me and I wrote this its not hard...

But bless you for jumping to the wrong conclusion straight away. :|

Jordy Clsie - June 10, 2014, 12:57 am

Thanks for sharing, wont be using this for it's original purpose, but to sort out the basics of VB, it doesn't look like a really complex program.

CodeAssassin - June 10, 2014, 2:47 am

Its not. Lol. And you will have fun learning and breaking it all down. The fun comes when you start using databases and integrating other languages. Ie: asp.net, html, css, java script etc.

But nothing is complicated when you break it down to its base elements. I like vb as its very easy to understand whats going on.

Have fun

Horizz - August 9, 2018, 6:55 pm

Download link, how to download grabber, quiero obtener el link de descargar muchas gracuas

michswar - August 10, 2018, 7:32 pm

@CodeAssassin

Thanks for this source

Onireves - August 10, 2018, 7:37 pm

You should upload it to github

Thanks for the source!
