This is the only bomber on HF that sends pictures, get it now while it's cheap!

Accoy - June 7, 2014, 12:19 pm

Wow I can't buy this now but it looks like a good product. Nice.

?lvNet™ - June 7, 2014, 1:14 pm

Any vouch copies? I'd like to try this.

Accoy - June 7, 2014, 1:26 pm

I would like to take a vouch copy as well. I will give a full review on this or video review. Thank you

Nord - June 7, 2014, 2:04 pm

Do you have French Providers? If yes who?

EDIT: I didn't saw the spoiler.

I'll buy it when this will have "Free Mobile" "Orange France" and "SFR"

Anyway this looks really good, good luck with sales mate

Six-Nine - June 7, 2014, 2:13 pm

What makes this the #1 bomber here on HF?

f1sh - June 7, 2014, 2:25 pm

Link me to any bomber on HF that supports custom SMTP servers and can bomb picture messages. My partner was hosting the sales thread though he's going out of the country for quite some time for summer break and he established a pretty decent customer base already if you're referring to the freshly created thread.

?ã?ž?® - June 8, 2014, 7:55 am

man i really wish people would go back to using servers insted of the gmail method. I would buy if this was web based using servers. You should consider it.

You can use your own SMTP server, you don't have to use gmail and I don't really see the difference, this will run on any machine that has Java.

?ã?ž?® - June 8, 2014, 9:44 am

the difference is that google requires a phone verification to make an account. So when you get reported for spamming they can trace you

Think before you post, please.

Erwin Schrödinger - June 8, 2014, 10:02 am

This looks really good!
However, you don't have Telenor Norway.
Do you know when you'll get that, if ever?
Thanks! :D

Yea, that can be added. ?

If anyone else has any carriers they'd like to see in LiBomber, feel free to PM me.

?lvNet™ - June 9, 2014, 3:43 pm

You should try and setup a number spoofer on there aswell. Would be a cool addition.

I'll definitely look into it.

(Jun 10, 2014 09:15 AM)Size Wrote: [\[CITE\]](#) High Quality products broski {^,^} Good to see :D
Thanks for the vouch man, glad to see you too. ?

Remember, this is the only message bomber on HF that can send pictures too!

If you need your own private SMTP server, feel free to let me know and I will provide one for a cheaper price than anyone else.

Added a few new carriers, contact me if you don't see yours on the list.

Andy Botwin - June 18, 2014, 4:07 pm

Just used this bomber to send picture messages to my friends phone, worked like a charm. Good shit high quality product from Behemoth.

jaco - June 22, 2015, 3:47 pm

Does this work for UK networks?

Bob White - June 22, 2015, 3:49 pm

But don't you need gmail accounts with these to work? In my experience the non web based bombers that require gmails stall out often and get your gmail accounts banned really quickly.

Big Ducks - June 30, 2015, 1:35 pm

do you think you can make a video of how to use this?

EDIT: if you do ill most likely buy it

Nope, you can get your own smtp server for like \$1 off site which is literally the same thing the web based ones are doing. ?

f1sh - August 16, 2015, 2:38 pm

Just wanted to let everyone know that the best multi-platform (works on Windows, Linux AND Mac) PICTURE and message bomber on HF is back online.

<https://aiobuy.net/buy/2339> -- I also setup an autobuy, big thanks to Alex.

SmurfonWheels - August 23, 2015, 6:08 am

paypal is not working its saying This recipient is currently unable to receive money.

He messaged me on skype and said his pp is limited due to that autobuy, probably best to buy with btc.

SmurfonWheels - August 24, 2015, 6:44 am

i have no clue how btc works xD never used it XD

Bob White - August 24, 2015, 1:19 pm

Just purchased, will report back with results. ?

Edit: Next day, still waiting for delivery. You should really have some sort of auto delivery.

You really should look up the UID of the seller before buying

-
Doubt you will even see the product :/
