You're welcome. That is kinda off because I watch anime on crunchyroll (im premium), and I get episodes sooner than they are released for free.

ie. New ep of The irregular at magic highschool is on saturdays for me, not on sundays. (it shows it in sunday on anichart)

Thats why I'm asking the members of HF for help lol

No, you don't get episodes sooner than they're released... Seriously, what?

Anichart goes by when episodes are released in Japan, by JST which is UTC+9. It's completely pointless to ask on an international forum what series air on Fridays taking timezones into consideration if you're not even going to state your own timezone.

Use anichart and do the math yourself, it's not hard.

Oh, sorry. I thought anichart was based on when the episodes are released for free o.o
