Why do you think that? I'll be always updating it.

Anonmoosekaab - June 7, 2014, 2:15 pm

Not too sure what "startup spread" is but it sounds interesting. Anyways good luck with your crypter as it looks promising

i hope it will work....looking Good

is it working with imminent or Njrat????

incoming - June 8, 2014, 4:22 am

Interesting, what is the stub coded in?

Not sure, but it should, it automatically detects best stub settings when building.

Explain to me how this in C# yet you have no dependancies? Last time I checked C# is .NET dependent.

C++? Then why a 400kb stub?

I was just asking a question no need to get upset.

Damn, I woke up to comment on your reply, sadly Marvid and ibennz were faster T_T

Captan - June 9, 2014, 1:21 pm

You guyes are right, I was originally hired by an HF member to do this project for them.
This is my first crypter, the one that hired me gave me wrong information I guess.
He told me that No Dependencies ment that there would be no .dll files when the stub generates.

I guess he was wrong?

So you did this project for them? And the person who hired you gave you the wrong information? How can someone give you wrong information when, you made the project in the first place...

Or your saying you hired someone to make this for you and you taking over?

Explain that and I leave.

I dont have to explain anything at all.

The person who hired me gave me the wrong info yes, but at the nearing end of the project he didnt want it anymore. I dont know why.

So there you hve ur answer.

But i guess ill remake it and this time make it 100x better
