Is the vuln still there? Is it worth trying to do this challenge?

asm-99 - October 5, 2014, 6:23 am

I didn't find it.

I tried everything I know but always got the error page.

I even try to get something from the pics(glosaary, meterogist) using google dork but still nothing

Can you solve the challenge if it's already end?

Arqa - October 5, 2014, 11:20 am

I wonder how many people believed that this is NASA's official site and tried a combination of Hotspot Shield with Havij Pro.
