Looks nice, GLWS if you want to give a vouch copy, let me know.

Anonmoosekaab - June 8, 2014, 3:44 pm

A decent priced survey locker for the features you say it has. GLWS

?Schock - June 8, 2014, 4:10 pm

Hope someone buys it

I do think it is worth it

S?Nk - June 8, 2014, 4:16 pm

You forgot to include much important information such as what language it's programmed in, what dependencies are contained inside the binary and also your features are very uninformative and should require a description of sorts.

It is coded in vb.net and about the features ...

It is just a survey locker cant tell many features
It has anti task mananger and msconfig features but nothing else

What about cmd and regedit? There are many more ways it can be killed rather than just taskmanager and msconfig.

Yup it also kills these
Im on a phone so typing could be annoying
Forgot to add these to the thread design

Updated the thread design with the things it should kill.

You don't need to pay for support that is included

Updated the Gui of the locker to a more legit looking one.

Well you're deploying malware, onto someone's PC, forcing them to complete something for your gain. So yes, whitehat

Corpinator - June 22, 2014, 7:52 am

Its blackhat not whitehat, product for personal gain. Program looks good probably will buy it in the near future.

BerryP - June 26, 2014, 12:31 pm

Sorry, but what so special about the program ? Why I wouldn't use a free tool or code my own survey locker ? There's no file encryption, no rootkit, so nothing special that is worth 10 \$

No one asked if you could or couldn't code one of these, if you can code one yourself why are you posting on a thread about buying one?..

BerryP - June 26, 2014, 12:48 pm

Because I want to 'protect' newbies, the program is nothing special and there are thousands of free ones...

Add a rootkit (ok it's vb.net (I think :P)), some more GUI options, file encryption (of course with decryption) and then it's worth 10\$

Because it is FUD that's why
A free survey locker will never do the job.

BerryP - June 27, 2014, 5:59 am

"Because it is FUD that's why

I don't see any function that would cause a detection... And why I would take a little bit more money and buy a crypter ?

I don't see the reason but ok, I don't want to spam your thread anymore.
But I would add the features, then I would (not into making money illegal) buy it.
Just meant as a hint :)

How is this a waste of money

Also I've only had 2 sales so far so don't think you will get a lot of replies of real customers

If it doesn't work, it is a waste of money.
That's why it would be nice to hear from some customers.

Most lockers won't work - either because, they simply don't work or because people choose to remove it instead of doing a survey...

So yeah, I would like to see some earnings from your customers :)

Yes it does if it looks realistic then people will not uninstall it instead of that they will try and get their computer unlocked.

Sorry I'm not begging for costumers for vouches and fake Earnings
If you are basing on these things then you are in the wrong place
HF is a big monetising website where 50% of the kiddies post fake vouches and fake proof

So you say every single kid on a computer knows how to install something in safemode
Maybe only 5% of the people who get a survey locker on their pc or other kinds of ransomwhare will use safemode to remove it

In other words I'm not a kid who comes here and would scam without the costumers knowing you scammed them
I do not lie about my products

You're not scamming them.
The survey locker really does its job, but most of the people manage to uninstall survey lockers (with or without help).

I can run it on, let's say 1K bots (or more), you can keep the earnings, but I want to post the earnings in this thread.

What do you say? ;)
