Thread: [DoSBox- The New Generation to DDoSing \[2.0\]](#)

Yin - May 17, 2010, 8:58 pm

[img]http://i47.[censored].com/153u0q0.png[/img] DoSBox 2.0

Tired of your shells going down?

Tired of those shell providers who guarantee that the shell will live for one month but it doesn't?

Tired of Spreading?

Tired of recrypting your server again and again?

Tired of being botkilled?

If you answered yes to any of the above questions, then we're pleased to inform you, we've got a solution to your problem!

That's right the all new DoSbox

Features

{+}Unique Bots, No one except us uses them

{+}Offshore IRC in Bosnia with no logs to protect your privacy

{+}Crypted to keep the details private and secure

{+}Hardware ID Lock to keep the leechers out

{+}Powerful SSYN & UDP Flood

{+}Support for XP, Vista & Windows 7

{+}URL 2 IP

{+}Dual HWID + Login System encrypted with MD5 on website and RC4 on program.

Pricing/Packages

{+}DoSBox Bronze

- One Server

- \$12.95 a month

{+}DoSBox Silver (Coming Soon)

- Two Servers

- \$20.00 a month

{+} DoSBox Gold (Coming Soon)

Three Servers

\$35.00 a month

What do I mean by Server & More

The servers I'm talking about are channels to botnets to control them.

There is NO port forwarding required to use this application

You just open the program and start DDoSing. Easy as that

Payment Methods

Payment methods: PayPal as a gift.

If you are interested, contact him via MSN/AIM or you can PM me if interested or ask me for my MSN via PM.

-no longer being sold-

ALL SALES ARE FINAL.

If you think the prices are too expensive, this is botnet. Some people charge up to 15\$ a day, this is pretty cheap

Taserz - May 17, 2010, 9:00 pm

interesting waiting on vouches and reviews comments first

Yin - May 17, 2010, 9:05 pm

Two buyers already have it, I'll get them to post here eventually.

nofear1999 - May 17, 2010, 9:07 pm

here are some on my old threads

[spoiler] (Apr 25, 2010 01:23 AM)M0D3RN H4X3R 2™ Wrote: [\[CITE\]](#) My review

The first thing I found great about DoSBoX is the amazing and simple GUI. The GUI of Boxnet is very appealing and a great pleasure to use. I had no problems finding my way around and the visuals were great.

<http://img214.imageshack.us/img214/4854/41787582.png>

Moving on, lets look at the power. Now, he said it only has 1 shell and I can only attack up to 60 seconds because I have a review copy, ok, alright that's fine with me. I wasn't expecting much with just one shell when the paid copy had much more - but....

<http://img219.imageshack.us/img219/3996/capturevf.png>

Warez-bb. It took down warez-bb. I was amazed at the power of this program. With only one shell it can take down warez-bb, imagine having more than one shell...

Overall: Great buy, highly recommended! Very powerful and just overall great!

(Apr 25, 2010 01:27 AM)Coyney Wrote: [\[CITE\]](#) Yeah Sorry For the Late Reply I was trying to figure out how to get an ip of a website.

So Here it is:

The GUI is great and I like the transparent background, he said it can take down ware-bb.org so I thought I might try and take that down, after a few minutes of searching on how to get the ip on a website (yes Im a noob) I finale found out and it took the site down with ease. Excellent Program and for \$15 you get Unlimited Updates So It's wonderful![http://i41.\[censored\].com/qqb8uf.jpg](http://i41.[censored].com/qqb8uf.jpg)

(Apr 29, 2010 11:53 AM)cornflakez Wrote: [\[CITE\]](#) Works 100%.

Definately a good buy!

Thanks man. Good support.

that enough vouches Taserz :P?

Taserz - May 17, 2010, 9:09 pm

yep lol. Just wondering how many bots are in each channel

SIM-38442 - May 17, 2010, 9:10 pm

WTF!!!! one shell to take down Warez-bb.org?!?!

nofear1999 - May 17, 2010, 9:10 pm

Well soon my friend will be donating a shitload of bots into the IRC and then we'll be opening 2 more channels. (silver & gold)

StarStream™ - May 17, 2010, 9:24 pm

Dude this is an awesome idea i would totally buy if i had the money
Hope you make a good profit from this

minimal?st - May 17, 2010, 9:35 pm

So let me get this straight.

It connects to an IRC Channel? Where they DDoS, etc?

I could make a small donation of bots if that is how this works. (100-300 bots sound good?)

nofear1999 - May 17, 2010, 9:40 pm

Yes that is how it works and everything is encrypted :) it's all secure and I had a really good cracker test vulnerability. So a great cracker like h3llboy if he could crack it would be a bitch for him to crack

xD

Supreme Kai - May 17, 2010, 11:08 pm

Very very cool.

Added your MSN.

90% chance i buy :D

Vip Trin - May 17, 2010, 11:30 pm

Nofear is a good guy and helpful, hope he can understand my situation and we can be friends.

Supreme Kai - May 18, 2010, 2:57 am

Question":

Do you add the bots on the channel or do i need to put them in.

Explain detailed Please.

sorry for my bad english im dutch :)

nofear1999 - May 18, 2010, 8:15 am

You don't need to do anything, I load the bots in and everything. You just click Join then Login and type in details then click SSYN or UDP

Also people keep freezing my MSNs so use this one nofearhf@live.com but preferred is AIM which is zephyr32399

I love it how competition makes people vote this thread one haha

Orgy - May 18, 2010, 9:12 am

to be completely honest, controlling an irc botnet through an application sounds pretty interesting. Looking forward to seeing reviews and comments. Good luck. (Also, free bump)

IWAM - May 18, 2010, 9:27 am

This is an awesome offer. Good luck. :)

Yin - May 18, 2010, 1:06 pm

Yeah, the panel to do it is really easy. No logging in or anything.

nofear1999 - May 18, 2010, 4:01 pm

Sales are PAUSED

The IRC got removed because they thought I tried stealing bots.

I'm getting a new IRC from twBooter.

Should be up when I get 9\$

I'd be weary with that.

nofear1999 - May 18, 2010, 6:23 pm

Why should I be weary? o_O

Yin - May 18, 2010, 6:39 pm

Maybe buy IRC from someone else.

evilalex - May 18, 2010, 6:47 pm

This is a genius idea!

I will consider buying!

edit: so it is irc bots or is it shells? im confused.

N3TH.org WarZe - May 18, 2010, 7:03 pm

Simple GUI, nothing to see. You just fill in a time and the IP and what type you want to do.

Axanas - May 18, 2010, 7:14 pm

I'll buy.

Can I review though? I just would like to try it for a couple minutes to see if this is worth it..

Generally, on this site, you get scammed a lot.... (Not necessarily, but people exaggerate the power of stuff a lot..No offence man, just stating my opinion)

And when is Gold going to be up? Three servers... How many bots per every one?

Just Pm me back when you have the time. Thank you!

Yin - May 18, 2010, 8:24 pm

Death, he might give you one, but sales are paused for now.

PlaySkool - May 18, 2010, 8:32 pm

Haha you quoted our convo. The security on this was awful 3 days ago. I cracked it in 30 seconds. Now I spent 2 hours and couldn't get it. I didn't say you could post that convo nofear lol.

Oh that's why I couldn't take down a shoutcast server this morning... Your net is gone!

Ah, okay that explains it :P

nofear1999 - May 19, 2010, 10:03 am

Sales will be up when iPixelated gets his ass in gear and makes me a new stub. I got IRC now though. and lol @ estone trying to crack my program and corrupts it and states he has it on my old IRC and when I tell him it doesn't work he says it was on the TW IRC and I said I never bought from them he said it was on BlaiR's IRC.

that was total failure :P He deserves to die for corrupting my file.

HardWareGuru - May 19, 2010, 10:15 am

Send this to h3llb0y

I bet he cracks it in say..under an hour?

nofear1999 - May 19, 2010, 11:30 am

I don't want h3llb0y touching any of my programs it will probably get leaked all over the internet.

Bronze will have anywhere from 500 to 750,
Silver will have anywhere from 800 - 1.2k
Gold will have unmetered.
I still need to crypt it still.

Because It's Denial of Service Box before, I used PHP DoS shells. Aka Denial of service BOX.

Now it's just a god damn DDoS tool but same name so my DoSBox customers would be happy.
