Hello Members of HF I recently was going through my clients, and I picked up on one that I deemed stranger then the others. I then took some look into his files and I found Child Pornography. What should I do?

Asuna ? - June 8, 2014, 2:02 pm

It's a tough decision

If you report him you may be asked how did you know
And if you don't he is doing an awful thing

I would suggest trolling him a lot
Scare the shit out of him ,
Msg me and I'll help you get as much info as I can on him

RA4W - June 8, 2014, 2:04 pm

Report him anonymously to the police.

Asuna ? - June 8, 2014, 2:10 pm

(Jun 8, 2014 02:04 PM)RA4W Wrote: [\[CITE\]](#) Report him anonymously to the police.i would strongly oppose that idea

The police could easily then find out that the OP has a rat and slaves !

ZuGgY - June 8, 2014, 2:11 pm

Maybe you could do a anonymous report. If you can do that, go for it, otherwise I wouldn't advise notifying authority as they can ask you or press charges against you too, for ratting.

Incognito™ - June 8, 2014, 2:12 pm

As you can see i'm torn on what to do then again trolling and scaring the person seems fun it may end up badly, Not Sure what to do tbh.

Asuna ? - June 8, 2014, 2:15 pm

Hey bro pm me and we can talk more ! :)

iColaahh - June 8, 2014, 2:17 pm

That's tough, because if you report him, and they know that you've found it using a RAT, he's a free man, because of the way the evidence is found.

Of course, this differs from country to country.

That's why he would report him anonymously.

Dereck - June 8, 2014, 2:20 pm

ransom his ass, report him anyway (anonymously).

Magicmann - June 8, 2014, 2:20 pm

Report him anonymously, and uninstall the RAT from his system.

Incognito™ - June 8, 2014, 2:23 pm

I've got Audio Recording / Webcam Capture going he is currently on facebook.

?Schock - June 8, 2014, 3:52 pm

Milk him out and do not report him if you are planning to milk him out

Dex? - June 8, 2014, 3:53 pm

Report him under his IP and computer.

Tell the FBI that he feels bad and wants to come clean for what he's done.

I like this idea, the sick fuck needs to have what's coming to him and this would be awesome ;D
Catch him when he's away, contact the CPA or something from his PC then uninstall yourself

Supreme??????? - June 8, 2014, 4:04 pm

Try to report him anonymously in any way possible.

Mr. Re - June 8, 2014, 4:05 pm

Send the police an anonymous tip, under proxies of course.
Or call them, just don't give them your name or location.

Or you could earn money and blackmail him.

I really don't give a fuck about him being arrested

tobyyy99 - June 8, 2014, 4:07 pm

use socks5 so you use his ip and make it look like he gave him self in.

TheLionsDin - June 8, 2014, 4:09 pm

Sell the slave to the police for 20\$
Then make a scam report on HF.
Have witnesses.
File a lawsuit

It's down to the person, I personally cannot stand to see someone looking at abused, sexualised, raped and beaten kids online. And the OP seems to feel the same and I'm sure if there wan't an opposite to this (him being caught too) then the OP would've acted without quesiton.

VictorXY - June 8, 2014, 4:11 pm

Do not report him. Chances are they will check his computer and then you're fucked. As sad as this may be, people like him exist throughout the entire world, nothing can be done about these morons.

Likely the worst thing you can do. Sicko might already be on a watch list and monitoring his activity's, if that's the case fed's may be looking at his traffic and your rat traffic might set off alarms.

Maybe could report via ic3.gov but they ask for your info.

All I'm saying in the event this guy get's caught they will scan his pc with a fine tooth comb.
Meaning they'd find evidence of your rat. Yes even if you uninstall so hopefully OP use it good security.

Ha Haaa - June 8, 2014, 5:17 pm

Delete his system32 and fuck his comp up. We don't need sick fucks like this.

Anonmoosekaab - June 8, 2014, 5:34 pm

Make his homepage the FBI site and if you have admin rights modify his hosts file to make his most used sites go to the FBI site too

Darc - June 8, 2014, 6:00 pm

You should try to get enough evidence and provide it to the police. People like that are sick and deserve what's coming to them. You should definitely tip something to the cops. Some people might say it's dangerous to do this but if you take the necessary precautions you will be safe.

OoOoOo - June 8, 2014, 6:16 pm

I'm always getting weird Indians who view bestiality. I'm guessing that's a trend over there.

Hongothacked - June 8, 2014, 7:19 pm

We are not the ones to judge. Many of us have seen and done bad things and ended up better human beings. Don't take that chance from him by reporting him.

Imagine the bad things you did in your life and now imagine if someone was hijacked in your mind and decided for you. Convincing someone by force is the bad way to do it.

If you see him browsing for elementary schools and taking notes, report him.

You have no idea how much drama you can cause in his life. Think of his parents/siblings etc.

OP: Black mail him.

That's a newbie mistake too make. The instance you start "Black mailing" him. You'll end up regretting it. You don't know the mental state of another individual. And you don't know how he'll react from going through the whole experience, which might drive him over the edge. Then you'll really be fucked. You never Black Mail your victims. About the dumbest mistake you can make.

Hydra - June 9, 2014, 1:06 am

Send his friends some proofs of his activity with cp then his life is fucked... nobody tollerate this and with some luck someone Report him for that :)

FaveN - June 9, 2014, 1:53 am

Contact the police from a new phone with a new phonecard or something like that.

Firenet - June 9, 2014, 6:10 am

report him but anonymously . don't get caught .

Nord - June 9, 2014, 6:29 am

From what country he live If you ALWAYS used a VPN for: your no-ip (and for your registration too), used a Fake adress etc during the registration. Used a secure mail provider (like ProtonMail or CounterMail) or if you always used a VPN and used a fake mail (the mail you used for no-ip) then you can report him for sure without any problems.

Here's a simple way of putting it. Grow some balls and black mail him or just uninstall him from your RAT.

Priizim - June 9, 2014, 11:14 am

Perhaps post the pedos Ip, maybe some proof of wrong(filenamees< no PICS!)? It's retarded to assume that the Feds don't check this site. So, perhaps they will grant you a pass for the time

being? I cannot say for sure but, maybe the capture of CP is slightly more paramount than a botnet?

That is up to you,

lawlessguy - June 9, 2014, 1:35 pm

I would fuck with him as much as i could and then empty his bank account :) O yea and after u empty his bank account make his computer unusable

FIND OUT HIS EMAIL AND SEND IT TO HIS WIFE.MOM,BOSS ect!

lucyskidmov - June 9, 2014, 2:59 pm

You need to becareful in a situation like this. However, people in this thread need to consider, this could be your kids. Paedophilia is illegal for a reason. It wrecks peoples lives, not momentarily but the effects can be incredibly long lasting.

These people have a lower IQ than your average human [this isn't just me being rude, but actual research] and are dangerous in their own way to society. Compared to a drug trafficker the harm a paedophile expends on society is much much greater in my eyes. Personally, If i had one pop up on my slave list, I would most likely blackmail them and show them the information you have against them. Maybe you can find a CV or something on their computer too?

Of course, I would also tell you once you're done with your antics to anonymously report it to the police. I'm sure you can figure out how to get this information to the police anonymously and safely.

Not all paedophiles have low IQ and are dangerous, some of them secretly live with their parraphilia and see a therapist.

Incognito™ - June 9, 2014, 3:44 pm

Thanks for all the suggestions guys, I'm thinking of reporting him it seems like the right thing to do.

logging*machine - June 9, 2014, 3:46 pm

Do this:

Delete it.

Delete system32

Namarie - June 9, 2014, 3:48 pm

And what makes you any better? You spy on people with trojans, likely hoping to find a cute girl.

You are just about as bad yourself.

Jestar - June 9, 2014, 3:58 pm

If you were to report anonymously it wouldn't matter. The police would confiscate the computer and find the RAT client on there. They would trace it back and bam, they are on to you. If I were you I would delete the folders and his system32. Wreck his computer.

zoh - June 9, 2014, 4:00 pm

Blackmail the fuck out of him. Get him to pay you alot.

BeckyG ? - June 9, 2014, 4:01 pm

1. You deserve to get ratted if your dumbass downloads a " Paypal money adder" or a "Gift card generator".

2. A lot of people want to monetize off their botnets not be fucking creeps .

esin - June 9, 2014, 4:19 pm

You would be in has much trouble for the child porn as he would depending where at in the world you are at, Technically you have control over whats on his pc too, I would just delete the man and move on to someone else, the cops are going to ask questions when you do report and ask how you got the information and unauthorized access to his pc will get you in trouble, you can try to report it annon style but police need evidence to actually do anything, be very careful about this op this could land you in trouble depending on how you go about it

This. Not going to try and justify the unjustifiable but just because he's sick, doesn't necessarily mean he's a bad person. Why not get a little bit more info on him like name, address, phone number, employment details, family details and then send him an anonymous email telling him you know what he's into and telling him to change his ways or deal with the consequences while quoting all the information you found.

R?DSPY - June 9, 2014, 5:45 pm

Good luck

JackChitt - June 10, 2014, 5:17 am

I personally like to use ransomware on pedo slaves. I have a copy of cryptowall that I execute on their PC that causes them to lose all their porn. Works quiet well in situations like this.
