Great program Operative, will post my attempt at one in a bit.

Edit: Came up with these two:

This is a really cool program thank you for sharing :) You should know that Chrome is blocking it as a 'malicious program' and despite your virus scan that may put them off.

Might want to upload somewhere else :)

(Btw, it is clean.)

This is super cool!!! :D Thnx alot mate! :)

N if I may suggest, try to animate it! ;)

Created a Mac Port of it, seems pretty good :)

Though I would personally like a 'direct upload' option for uploading directly to for example imgur.

DL link for anyone who wants to use the program on a Mac: <https://www.sendspace.com/file/gfvv3e>

Feel free to link and use this port as you wish OP!

Note: Due to that this is a standalone application with wine included it's A LOT larger than the original Windows application. (2.2MB vs 250MB)
