Thread: [Free custom OMC and BTC addresses](#)

SIM-2015410 - June 8, 2014, 11:08 pm

Hello everyone

I will be generating custom BTC and OMC addresses for anybody who wants one. I will also do other cryptocurrencies if you make a special request.

I will only do strings of 4 characters or less (unless you somehow prove to me you deserve a longer one) - i don't have much time spare to waste on this ?

Please post below, don't PM me please. Use this format:

Code String: -

OMC or BTC: -

Thanks!

If you don't trust me to delete your private key straight away, don't ask for my service. You have my word that I will not keep your keys or steal any coins. I hope you can trust me.

IF YOU WANT TO GENERATE YOUR OWN KEYS (more secure), CHECK OUT MY TUTORIAL:

<https://hackforums.net/showthread.php?tid=4275561>

You will receive your key in a PM from me within 48 hours i hope.

Please vouch if you receive an address from me ?

Any donations, my address is in my sig.

I wouldn't trust you, but it would be great to have on to show off, but why can't you just give out the method on doing it?

The method is easy, anyone can do it, im just offering the service in case people don't want to waste time.

Use Vanitygen, give it a string and it will produce a key for you. It can take a while for some strings though, that's why i'm offering to do it.

Check out my new tutorial on how to do this yourself:

OMC or BTC: - BTC

Thanks!

Sent! Hope you like it. You have my word that your private key has been completely deleted from my computer, and I will never keep it or give it to anyone else.

BarneyS - June 9, 2014, 5:25 pm

String: aniloraclove

OMC or BTC: BTC

Thanks!

OMC or BTC: BTC

Thanks!

I said 4 characters or less. That string would be almost impossible to generate. There is no chance.
