God praise Riot!

This won't change much if she 1 shots you before you can do anything back.

This. The amount of burst is still real.

Still, now you can do something, like flash, heal, other abiltys instead of dying etc.

Yes. The nerfs on LB begin. Now, get rid of her passive, q, w, e and r, and i'll be happy.

Aceman - June 9, 2014, 1:35 pm

Good that was the biggest issue when playing against Leblanc. I'm fine with the damage but the silence + chain allowed for little to no counter play.

Madison Ivy - June 9, 2014, 1:40 pm

Well, finally they did this. It was so annoying to see her pop to my face without being able to do anything...

Mirx™ - June 9, 2014, 2:46 pm

No silence, finally i can do something about getting all in'd.

cacnecac - *June 9, 2014, 3:22 pm*

About time, her playstyle reminds me too much of the old Kassadin, since RITO took away his silence thank god they are doing the same for LB, shes still a crazy burst mage though.
