Thread: [CloudFlare Backend Resolving](#)

I R PK3R - June 10, 2014, 7:38 am

Are you not able to find the backend of the domain you want to DDoS? Then it's your lucky day.

Today I will be resolving the backend of a website of your choice for FREE.

With a ~95% success rate, my service is way better than those shitty CloudFare resolvers.

I will be doing this for Ub3rs/L33ts only. Normal users may PM me and I will consider it.

PM me or post the domain here and I will try to resolve the backend.

?

My service is way better than any resolver or free service. I get the backend of any website. You seem to be too retarded to understand that which I'm not surprised of.

It is relevant because you're calling me a skid while I have more knowledge in my left nutsack than you do. Previous post proves my point.

It's annoying when clueless idiots post on my threads, so get out of here. You're not worth my time or servers.

Back to scamming people, only thing you're good at you poor idiot.
