Thread: [Need someone to code & design my website!](#)

Tiszy - June 10, 2014, 11:40 am

I need someone who can design a website for me.

What is the website about? It's a website for my product line here on HF. We're going to sell things there, so I need something autobuy things setup, I also need everything HQ, brand new and fresh. I'm going to sell products on my website, and I want a smooth menu bar and news on the site.

Let me know if you can do this.

I have spoken with ChrisCans and we have teamed up. If you choose us he will do the frontend and I will do the backend. Feel free to contact either of us.

Let me know if you're interested in my services. I'd be happy to implement a coinpayments-based IPN system (to support paypal and all the coins you could want) into a custom-designed site. Unfortunately, I'm a coder and not a designer, so I'd need a PSD or similar from a designer to work off of.

Can you find a designer to work with?

You haven't posted anything but I can do the PHP part of it ;) I can't do the design thought! LMK :)

Tiszy - June 16, 2014, 4:44 pm

I need someone who can do both, and I still need someone :P
