Thread: [Get bitcoins, gift cards and Steam games for free! \[Tremor Games\]](#)

josmerod - June 10, 2014, 1:10 pm

This site offers Steam, Desura and Origin games, trading cards, gift cards and even Bitcoins just by logging on the site, playing games and also completing some offers, tasks, watch videos, register on some sites, etc. They've have recently added bitcoins as a reward so you can then transfer it into Paypal money if you want. Depending on the country where you register you can get some interesting offers that gives a lot of points with almost no effort.

As a proof that it works you can check my payout here:

Here is the video version with some methods and a step by step guide:

If you want to register using my referral use this (thanks): [Tremor Games - Play Achievement Games, High Score Games | Win Gifts and Prizes](#)

If you want to register without referral use this instead (thanks anyway :(): [Tremor Games - Play Achievement Games, High Score Games | Win Gifts and Prizes](#)

Have fun and enjoy the new games on your library!

I've had this on other sites (i hope it doesn't on this one ?). Personally, I don't like doing surveys and watching videos and stuff. I don't mind doing reviews though.

I did a crowdflower task and was credited immediately. I wonder if I'll get enough to cash out on something.

Thanks OP for posting this and making me aware of this site ?
