Thread: [\[\\$2 - \\$5\] Programming, Web Dev, Troubleshooting, and More!](#)

JO33 - June 10, 2014, 7:16 pm

Hello, HF! I am an intermediate programmer and I am looking to help out the HackForums community. I am providing services of coding small programs, adding small features to websites, helping troubleshoot code, and anything else you can think of related to these services!

I am offering these services for a payment of \$2 - \$5, I will give you the price once you tell me what you need completed. I can create you a small program in Java, write you a PHP script for your website, design some features with HTML, CSS, etc. or do anything else you can think of (As long as it's not too insane :p)

If you would like to use my service, please post on the thread what you would like completed. I will then get a hold of you via PM. I prefer to use PayPal as my payment processor, but I am open to Crypto Currencies :)

Completed Projects:

Spoiler [\(Click to View\)](#)

Will update when I get a task :)

Vouch for my boy JO33 :)

Made me something & i am very happy with it.

Reasonable price also.
