Thread: [Cs Go Hacks safe or not safe ATM ?](#)

Shiverx - June 11, 2014, 8:03 pm

So been away for a month or so and come back to everyone getting banned (VAC detected). SO my question is are there any hacks that are not detected atm ?

Best bet is to just not cheat on any accounts you can't afford to lose.

Just bought some hacks and a new account and used virtual-advantage's shitty "undetected" cs:go hacks.

Isn't aimjunkies, virtual advantage, mombot and systemcheats just one hack with different sites and launchers?

There are no stable cheats that are totally VAC-Clean. Also with the new update of CS:GO, it's really hard to hack without getting detected.
