Hello HF

[img]http://saadalti.com/hf/fb.png[/img]

After Those Tutorials that i made!

- 1- [How To Create Unlimited Facebook Accounts Without Any Phone Number \[\[TUT\]\]](#)
- 2- [\[Facebook Tut\] Check if someone is blocking you \[Facebook Tut\]](#)
- 3- [\[Twitter\] Get 500 FREE instant twitter followers](#)
- 4- [\[Facebook\] 5000 Friend Request FREE](#)

I Would like to share this Website to you

Here we go guys follow my steps (Step by Step) :

- 1- Visit this [WEBSITE](#)
- 2- Click the Click Here Button to allow access and to get the Token
- 3- Skip this Add
- 4- Allow Access by clicking here
- 5- Here's the Token key before ?#access_token=
- 6- Copy the key before access_token
- Put it in the Hublaa website bar and click submit button
- 7- It Will Redirects you to this page :

Now the Work is done for the access token
Let's work on Fan Pages Liker

- 1- Click the Fan Page Liker Button
- 2-

3- Allow the App + click the second link to get the token if it's expired..

4- Put it below in the website and click the submit button

5- you will redirect to a page with names of your fan pages! click submit on the page you would like to add the likes to it and we are done!

Proof :

PS: you can make this steps every 5 minutes because it works on people's token, every person puts his token and allow it so his account will be controlled to add likes.

For your information if you are working on status, picture or photo album nor video? You need to put the post in public option!

Since you want to increase likes on your fan page but don't want to put likes on others.. all you need to do to make a new Facebook Account and make the second account an admin! so from the second account you can put your token! if you cant make a new facebook account because of a phone verify here's the tutorial i made

[How To Create Unlimited Facebook Accounts Without Any Phone Number \[\[TUT\]\]](#)

So Brothers if it's worked very well Vouch + Rate The Thread Please :Pirate: :Blush:
If there's an error please post the error and i'll help you out just comment :Victoire: ..

The token generates from your facebook account not from hublaa website.. so the error is your mistake mate not from the website.. the website works fine all you need to do is to follow the steps from the beginning till the end.. if didn't works check it after 3 hours.

If all the above didn't work create a new facebook account and test it on..

You're Welcome ?
