Anonload - June 12, 2014, 11:12 am

Yeah... vouch for the OP.

I am using this bot from 2 weeks and yeah it's awesome.

I have a question.. that what is Skype blacklist?

I would suggest trying to just speak to it in single chat with no others, and if that doesn't work try adding into someone into a group, but a different person not the same person.

JSFtm - June 12, 2014, 12:07 pm

Recently I have found that if you use any other command apart from !help first then the bot will reply so try to do a more simple command apart from resolve, then the bot should reply.

Premium is advertised as over 1,000 Minecraft accounts. I bought premium I have the features for premium, but everytime I use the Minecraft command, the same 5 names keep cycling through and I don't know why. Am I doing something wrong? I am typing !minecraft and getting the same names when I should be getting between 1,000 for premium.

Because you clearly no everyone else who has used it. Typical narrow minded idiot.

My internet speed is fine , that's a fact.

The application being free doesn't take away from the fact that it was given to people on this forum and they're allowed to comment on the application if they want to.

So just because it's free , I'm supposed to not complain about something that has went wrong in the application and only comment on the good of the application?

I bet without that userbar, you'd be a little bitch and not have the nerve to reply back with your arrogant comments.

Sure, try doing like "hi" or "!ddos" then doing a joke, or just add me on skype and i'll tell you a joke?? ;D

I did the hi before and it didn't work ^_^. DDoS didn't say anything, but it worked after that. Also got a netflix account ^_^. It seems to break sometimes, though:(. The !ddos then command fixes it.

Yeah, it's where our vps only has 1gb ram we need to upgrade it, can only have a certain amount of users on it at once.

Try doing a command such as !ddos and hi then try doing a normal command and it should work.

You mentioned !ddos twice in the thread design. There is a "your" instead of "you're" under !minecraft.
That's all I spotted by just looking. Looks like a really usefull and all in one skype bot! Might be buying this.
