GotHacked - May 18, 2010, 12:53 pm

Works great, its clean nice job there m8

King - May 18, 2010, 1:00 pm

(May 18, 2010 12:53 PM)GotHacked Wrote: [\[CITE\]](#) Works great, its clean nice job there m8
Thanks mate , if it wasnt a nice job i wouldnt post it here :D

King - May 18, 2010, 2:13 pm

Just 1 reply :S what if it is not FUD :P

the_last_end - May 18, 2010, 4:14 pm

any one test it ? s

Synster - May 18, 2010, 4:28 pm

anyone tested, how is the keylogger?

lobozebra - May 18, 2010, 4:38 pm

Does it send the keys to your email or what?

Krueger - May 18, 2010, 5:49 pm

Thanks ill give a try asap :)

Good job :P

11cad11 - May 18, 2010, 6:41 pm

Sorry, your account has been disabled.

I said test mail and google account disabled... does anyone have an idea?

[ZERO] - May 19, 2010, 1:51 am

make another one and try again, and be sure when writin email to write full adress, etc.
example@gmail.com

wowiegracilla4 - May 19, 2010, 3:29 am

Thanks mate.Too short LOL.

EHEHEHEHE !

Eagle 95 - May 19, 2010, 5:26 am

Is this software tested by someone?

-Eagle

King - May 19, 2010, 5:32 am

(May 18, 2010 04:38 PM)lobozebra Wrote: [\[CITE\]](#) Does it send the keys to your email or what?
Yep , it send it to your gmail account . This is a keylogger man

Eagle 95 - May 19, 2010, 5:35 am

Lol i know.But do you find some bugs in it.Ex: ain't sending logs?

King - May 19, 2010, 5:37 am

(May 19, 2010 05:26 AM)Eagle 95 Wrote: [\[CITE\]](#) Is this software tested by someone?

-Eagle

Man read the first comment and be sure it is working and FUD

Eagle 95 - May 19, 2010, 5:39 am

OK one more question: can you put some other e-mail,not only gmail?(on every keylogger including this one)

Ex: hotmail or yahoo

11cad11 - May 19, 2010, 8:14 am

still google disables my new account... I got 3 disabled google account this time i didn't try directly i did it... then i try to open server.exe then google disabled my new account does any body have an idea about my problem?

Clothar - May 19, 2010, 10:00 am

Very Nice

Thanks for sharing i am newbei for now so i want to ask something i created server.exe with ticked startup i build it and opened server.exe but there is no log file in my mail when will it send the log mail? then i download BinderByNathan72389 and binned in a exe file... but exe files were not working... can someone help me? or if there is a tut. about these can you give me the link i searched but i couldn't find...

i got the logger thx for that how can i bin that server.exe with another exe ? when i use binderbynathan exe files are not working for now...

also i tried Simple File Binder FUD it is not working too...

I Hack All - May 19, 2010, 5:27 pm

Sorry I am extremely new to this, but what do I put in the "server" part of the GUI? The IP?

JizE - May 19, 2010, 6:23 pm

when i create the server where did it save it to i cant find it

I Hack All - May 19, 2010, 7:52 pm

(May 19, 2010 06:23 PM)JizE Wrote: [\[CITE\]](#) when i create the server where did it save it to i cant find it

It should be in the same folder as the other files. At least that's where mine are.

King - May 20, 2010, 5:38 am

(May 19, 2010 05:27 PM)I Hack All Wrote: [\[CITE\]](#) Sorry I am extremely new to this, but what do I put in the "server" part of the GUI? The IP?In server part , u just put the name of the server u can leave it like it is , server.exe and u can change it to whatever.exe

Add to startup

(May 19, 2010 06:23 PM)JizE Wrote: [\[CITE\]](#) when i create the server where did it save it to i cant find it

You should first extract the files to a folder , say to the desktop .

open the crackhacklogger and build your server , you should get the server in the directory

(May 19, 2010 03:44 PM)11cad11 Wrote: [\[CITE\]](#) Thanks for sharing i am newbei for now so i want to ask something i created server.exe with ticked startup i build it and opened server.exe but there is no log file in my mail when will it send the log mail? then i download BinderByNathan72389 and binned in a exe file... but exe files were not working... can someone help me? or if there is a tut. about these can you give me the link i searched but i couldn't find...

i got the logger thx for that how can i bin that server.exe with another exe ? when i use binderbynathan exe files are not working for now...

also i tried Simple File Binder FUD it is not working too...i dont know about binder by nathan. but my simple binder is working very well , enter in file 1 the keylogger and in file 2 the fake prog or .exe prog . And it should work . i just tried it now

King - May 20, 2010, 11:22 am

Bumping it :D of course too short :P

cybershot619 - May 20, 2010, 4:20 pm

when i test email i get an error saying

Quote:"An error has occurred, settings appear not valid"

and the gmail username and password at correct, i can logon to the gmail just fine and i type the EXACT same thing...im getting so frustrated because this happens with EVERY keylogger i try!
CAN SOMEONE PLEASE HELP ME!?!?

King - May 21, 2010, 2:02 am

CAN SOMEONE PLEASE HELP ME!?!?Man there is not cause for it but using an incorrect username or password.

If u are sure of it write in somewhere then Copy & paste it in password field.

And check if the Caps Lock is turned on .

~Kidd~ - May 22, 2010, 6:28 pm

Well done.

Use: 5/5

Log: sends all information directly to email as promised.

Interface: Small, tiny interface capable of great power.

Logger: Truetype logger. Logs everything in a very organized fashion and works behind the scenes.

FUD: 5/5

All Antiviruses are oblivious. I have a box I always test this kind of stuff on with 25 Antivirus programs installed along with 10 spyware removals and they all go undetected and regularly updated. as of May 21st, 2010.

Price: 5/5

Nothing can beat free.

Major vouch, my Friend, Good Job.

King - May 22, 2010, 6:31 pm

Wow , Seth Shadows Thanks a lot for this :D you are welcome:D

solais - May 22, 2010, 8:37 pm

means a bit scrambled and hard to read :p and i didn't get IM stored password or something like i want ;____; :P anyway... good logger ? next time maybe you can add more features ;) great share mate

Breakbot - May 23, 2010, 8:56 am

lol didnt work for me says that my gmail doesnt work 0o"

DarkShadowz - May 23, 2010, 9:34 am

I'm wondering, does this support Windows Vista and Windows 7? I get the command prompt opening saying 'Program too big to fit in memory' then the command prompt closes.

morgado207 - May 23, 2010, 9:38 am

what stub.exe does?? cause i clicked on it :P

ArcanaForceXXI - May 23, 2010, 4:19 pm

Thank you very very much mate!! Awesome soft!!!

jesperbos - May 24, 2010, 1:00 am

Nice nice nice nice totally FUD :):)

Vanity - May 24, 2010, 2:13 am

Hmmm, a very noob question, because I'm totally new to all these...

exactly which file do I have to get victims to open in order to infect them??? is it Server.exe?

solais - May 24, 2010, 7:02 am

^ after u build, it will appear server.exe :) then that's what u need to 'give' to ur victim to run
if it works, then a ton of logs will send to ur email :)

rahulrhl29 - May 24, 2010, 7:25 am

Is it just me or is most of the people in this thread signed up from May 2010. Can anyone tell me if this is safe?

solais - May 25, 2010, 7:32 am

^ yes ! it works :) and still FUD until now as far as i know :)
i posted the log sample too on previous page :)

Teh Bot Noob - May 25, 2010, 7:35 am

Weird, my virusscanner detected it and the virusscanner on my laptop detected it to :(

King - May 25, 2010, 12:29 pm

Man i posted a virus scan , and check the others' comments . it stills FUD

Elite Hacker 69 - May 25, 2010, 1:37 pm

how the hell is this still fud..... LOL

ursmoked - May 25, 2010, 6:23 pm

Hey....

some skid tryed to sell me this lol

btw, if you open it in sandbox will it just shut down or will sandbox shut it down?

baxtecal - May 25, 2010, 7:41 pm

i dont get how to do this, im new to it, can u explain wat i put in the server name and the interval and do i check startup?? then do i press build?

Swaly - May 25, 2010, 7:43 pm

Ill give it a try , thanks

Enter Shikari - May 25, 2010, 8:33 pm

(May 25, 2010 07:41 PM)baxtecal Wrote: [\[CITE\]](#) i dont get how to do this, im new to it, can u explain wat i put in the server name and the interval and do i check startup?? then do i press build?

Server name = Filename you want it to be

Interval = How often do you want the logs to be sent (ex 1 for 1 minute)

Startup = Add to their startup I think... so yeah I'd check it.

And yes you press build.

CaLamitY - May 26, 2010, 1:53 am

i have put my gmail id and password then built server after that when i click on Test Email it says "An error occurred settings appear not valid"

xtraesp - May 26, 2010, 3:23 am

Not fud my a-squared detected it.

Ne0™ - May 26, 2010, 11:57 am

FUD Gone , Sad really. :(Thanks for this tool mate.

Ck1.3 - May 28, 2010, 1:16 pm

Very nice tool mate , we can crypt it too

poohead - May 29, 2010, 4:23 am

Um if i were to double click on server.exe or stub.exe would i be infected??? and how do i delete server.exe as i tryed because i put the wrong interval in and it says i need permission to delete. how would i get rid of it?? I am a noob.

Phase - May 29, 2010, 7:01 am

(May 29, 2010 04:23 AM)poohead Wrote: [\[CITE\]](#) Um if i were to double click on server.exe or stub.exe would i be infected??? and how do i delete server.exe as i tryed because i put the wrong interval in and it says i need permission to delete. how would i get rid of it?? I am a noob.

Yeah this. I double clicked Server.exe by accident. It's now sending logs to my email of myself. I don't want this. How do I un-infect myself? I've tried looking through processes, but when I try to delete 'cssrs.exe' which I suspect is, access is denied.

Help?

GotHacked - May 29, 2010, 7:40 am

(May 29, 2010 07:01 AM)Phase Wrote: [\[CITE\]](#) Yeah this. I double clicked Server.exe by accident. It's now sending logs to my email of myself. I don't want this. How do I un-infect myself? Help?

ALT+CTrl+DEL > Start task mang > processes and end process of server.exe in description it might be like hijack or something. Then from startup go to RUN>Msconfig>startup>un mark "server.exe" and apply :)

Then regedit startup preg>Del Server.exe !

GuJJu - May 29, 2010, 7:49 am

gmail account is being not getting verified...now i wont mess with this software...or gmail will ban my account and i don't wanna let that happen

hahahaha . why gmail will ban your account ? man go and see how a keylogger works :S
it just sending these keys to yourself

Scooby Doo. - May 29, 2010, 11:03 am

It works great, I wish i could just uninstall one of my victums...I set it to each 10 minutes. I wonder if I could block THAT e-mail? But still get the rest of the logs from my others victum?

The 7th Sage - May 29, 2010, 11:22 am

(May 29, 2010 11:03 AM)|.Amazing.| Wrote: [\[CITE\]](#) It works great, I wish i could just uninstall one of my victums...I set it to each 10 minutes. I wonder if I could block THAT e-mail? But still get the rest of the logs from my others victum?

if its the only victim, then change your id pass of email.

Scooby Doo. - May 29, 2010, 11:29 am

^ Ha good idea thanks, but I just need to wait for my next victum to download the link so I can get his runescape accounts, THEN i'll move on. If only my RAT server was FUD, i wouldn't be using the keylogger smh..

Hmm I just now realised, you really need a option to set for when the keylogger ends. I'm going to have to go back to my first victum, and get her to redownload my rat server when I get it fud..Smh..

Or is there a time it ends that you forgot to mention?

kingikram - May 29, 2010, 11:42 am

nice keylogger thanks for sharing ?

poohead - May 29, 2010, 3:10 pm

EDIT: nvm posted something really pathetic thank god i realised. However after looking at the task manager i cant seem to find the process, could it be hkcmd.exe? im such a noob i actually tried to end csrss.exe and only just found out what it was FML there was me crapping myself about some massive problem of blue screen etc. anyways any help?

kite2540 - May 29, 2010, 3:11 pm

I'm also trying to uninfest myself.

poohead - May 29, 2010, 3:17 pm

i feel like such a retard but i just wanted to see if it did anything when opened.

Gum - May 29, 2010, 7:36 pm

This is a great logger for beginners like myself (this is my first post actually lol).

Please bear with my noobiness, I have a few questions.

So i get it to work and all, but am i able to change the look? Cause if people see the icon as gears they might wonder or whatever.

And to get people to use it, do i need to send the keylogger and the stub? or just the keylogger itself?

Once again, great keylogger and I hope i can use it some more once you've answered my questions :).

So open up task manager, and make sure you know what you called the keylogger to begin with I'll call it Bob . Now look for Bob.exe, right click it and click end process tree and click yes. Then the keylogger is off your comp and you won't get any more emails about yourself. :D

EDIT: after many stupid posts making me feel like a retard i believe there never was the key logger active, i set the interval to 720 which is 24hrs and after the 24hrs of when i thought i activated it i believe i couldnt of opened it. but thankyou everyone!

so i basically just put my gmail, build server and send them the .exe ?

its a virus u dumbasessesits a virus u dumbasessesits a virus u dumbasessesits a virus u
dumbasessesits a virus u dumbasessesits a virus u dumbasessesits a virus u dumbasesses

What makes you say that?? are you infected from this?

Thanks, Nice Job Works Great :)

Thnx for the share , this is my first time downloader any keyloggers or hacks for a very long time , well try thnx again

works great , logs are only a bit hard to read xD

Can some give a little description of what to do. Like what file do i send my victim and how to bind it etc.

ive used RAT's but not keyloggers and im hoping this is as fun as rats

thank you for not using shitcash

when sending the keylogger to someone wat do i actually pass onto them? just the the "server.exe" then that will log there logs to my email?

Thanks, looks nice and great.

(May 31, 2010 07:42 PM)wAdeski Wrote: [\[CITE\]](#) when sending the keylogger to someone wat do i actually pass onto them? just the the "server.exe" then that will log there logs to my email?

Just pass the server.exe to them and it will send it to your email.

albanjan - June 2, 2010, 4:57 am

Thanks allot man :) I'm testing it right now :D

And it's undetected, so no need to hex edit :)

Happeh - June 2, 2010, 5:05 am

Thanks for the Keylogger. Testing it now. And thanks for the No \$hitecash! :P

usman14289 - June 2, 2010, 10:59 am

looks great testing right now

just showing the changing tabs and chat windows but still no chat or messenger passwords

Doctorbio - June 2, 2010, 11:36 am

It's a great keylogger. Thanks for the share.

usman14289 - June 2, 2010, 11:45 am

finally worked for me..but a bit messy i mean u have to search for the good stuff it shows a lot of window change i think every time you minimize or maximize it note all opened tabs...

i tested it on windows 7 with no additional framework installed....

Anybody who tested on vista??? without additional framework...

i think its better to test on clean install of OS because the fools i mean victims dont bother theirself to install any framework....

does not add to startup :(:(so itx of no use right now....plz fix de bug....

RAF97 - June 2, 2010, 2:00 pm

I don't understand what is the interval option ? and startup ?

Sorry for my english.

I have my answers.

Thxs =)

AtomicShockBlast4A - June 2, 2010, 6:46 pm

so how it keylog ppl i download it, tested it it works but do u send the server to ppl and they get keylogged, i am kinda new to keylogging lol i mostly phish :P

so how i keylogg ppl with this i am new to keylogging i mostly phish :P

Smallpox - June 2, 2010, 9:23 pm

Thanks for the download, it works great. Still FUD for my anti virus programs. Anyways, the only complaint I have about it is I wish you could make it where you could turn off the keylogger or at least stop the emails. Some dumb ass downloaded the file multiple times and clicked on it 50+ times and now I get around 60 emails of the same log every 15 minutes. Annoying as hell :)

Angel of Love - June 3, 2010, 1:03 am

after doing what he said.., use re enabler to enable blocked services

[HERE](#)

??

kyuubi_no_yoko - June 8, 2010, 12:51 am

new and noob :D how to send the server all emails don't send a .exe file , thanks.

sorry again and also when someone receives a .exe file the msn or the email tells him this file is mared as unsafe so no one will open it for sure so how to overcome this ?

kyuubi_no_yoko - June 8, 2010, 2:04 am

i did a test with my friend i sent the file.rar and when he received hotmail said it is unsafe but he opened it anyways we anted to c what exactly it does and yes i received logs but i have aquestion if someone has his msn pass and facebook pass already stored as in remember me and he doesn't type it then of course i won't be able tokow it right ? w8ing for ur reply as hotmail said it is unsafe .

wutter - June 8, 2010, 4:29 am

(Jun 8, 2010 02:04 AM)kyuubi_no_yoko Wrote: [\[CITE\]](#) i did a test with my friend i sent the file.rar and when he received hotmail said it is unsafe but he opened it anyways we anted to c what exactly it does and yes i received logs but i have aquestion if someone has his msn pass and facebook pass already stored as in remember me and he doesn't type it then of course i won't be able tokow it right ? w8ing for ur reply as hotmail said it is unsafe .

I'm no expert but that sounds about right. However, I did come across a keylogger that deletes internet browser cache etc. Maybe that's what you need.

Anyone know about this?

Also can anyone explain what the "Server Name" and "Interval" mean? I suppose interval is how often the logs are updated but , Server Name?

poohead - June 8, 2010, 1:29 pm

Server name is just what you choose the built file to be called so leaving it as server will create server.exe when built.

perierfrancois - June 8, 2010, 2:58 pm

Not fud anymore , only detected by avira ^^

kyuubi_no_yoko - June 8, 2010, 2:59 pm

omg this is so much i got 809 logs :D im supposed to read all ofhese just to find a password for msn or facebook ? :D + tons are saving it they don't type it so i won't be able to see it :D any suggestions here ? :D also no one said to me how to send it via email a i did that a tes with my friend and he opened the server although hotmail said it might be unsafe but normally ppl wont open

scampers - June 8, 2010, 3:18 pm

'Supports Gmail'

Gmail is crap and i assume most people here use hotmail like me

wutter - June 8, 2010, 8:00 pm

(Jun 8, 2010 01:29 PM)poohead Wrote: [\[CITE\]](#) Server name is just what you choose the built file to be called so leaving it as server will create server.exe when built.

Thanks poohead. If I binded the file "server.exe" to a picture and the result is "whatever.exe", can i then change that files extension to say "whatever.jpg".

scampers - June 9, 2010, 1:51 am

(Jun 8, 2010 08:00 PM)wutter Wrote: [\[CITE\]](#) Thanks poohead. If I binded the file "server.exe" to a

picture and the result is "whatever.exe", can i then change that files extension to say "whatever.jpg". Should be able to i mean, most people do it and i wouldnt be surprised if there was a tutorial for it here

scampers - June 9, 2010, 3:24 am

What is the point of a stub file?

do you need it in the same folder so keylogger can run?

Hacka4eva - June 9, 2010, 3:44 am

I wanna test it first on myself, so what can I do after I am infected? Any extra tools?

reda10 - June 9, 2010, 7:16 am

No more FUD, Avira detect it :)

Kelleigh - June 9, 2010, 12:08 pm

^^thanks, saves me using it. But a big thanks to Boodye :-)

axman101 - June 10, 2010, 6:46 pm

Whenever I try to test my email it tells me the information is incorrect but I know it is....anyone have a solution?

Also...one more question. All I have to do is bind the server.exe file to a picture or something and change the extension to .jpg or something and then e-mail this to someone and when they open it the program will e-mail the results of the keylogging right?

vampirictorch - June 11, 2010, 11:35 am

Testing now however, I love how it hides in the "System Configurations" i seen quite a bit of keyloggers that don't so to view it I have to go to task manager :P

Edit:

works great but no longer FUD =(even when encrypted but nice up

SHARB - June 13, 2010, 1:59 am

not anymore Fud Avira defect =(

2. Is it working or noit???

jonnyc55 - July 3, 2010, 7:50 am

Note: Alot of the positive comments are made in same month, I think the OP bought his hack forums account somewhere and is trying to keylog us...?

Stop spam making new accounts.

Tyler07003 - July 4, 2010, 12:57 am

What do I put in the server name? And how do I get it to work? Thanks

northern - July 4, 2010, 3:07 am

it doesn't work. However its found as a trojan by nod32

V1P3R - September 17, 2010, 12:15 pm

awesome job bro !!

hope its still FUD :/

DarkSeven46 - September 17, 2010, 5:34 pm

Nice FUD keylogger, work on the GUI tho.

evilwcownz - September 17, 2010, 9:42 pm

Virus, my bit defender wouldnt let me go to the webpage because

Virus name:

Trojan.Generic.4471516

King - September 17, 2010, 9:47 pm

Yes evilwcownz. That's true.

This was an old thread.

eXpLoD - September 18, 2010, 2:57 am

Nice keylogger,you did a very good job.

Ton33y - September 18, 2010, 4:25 am

Hiya, i would like to know if it's still FUD, or UD?

It looks like an amazing keylogger, no joke!

nikkiy - September 18, 2010, 7:08 am

That was good work Thanks for the logger.

WINDFuCKER - September 25, 2010, 8:55 am

Woo mate! This is insane! The best keylogger ever! Thank you very very very much! I love you...

:DDDD

xxajxx123 - September 26, 2010, 8:32 am

hey mate i downloaded and just gave to someone now waiting for logs :) hope it works

xxajxx123 - September 26, 2010, 9:41 am

its doesnt work :/ FML thx dude this doesnt even WORK >:(

Progr@mer - September 27, 2010, 3:01 am

Works great, its clean nice job there m8

logos - September 27, 2010, 9:44 am

how it work man give idea!

kidcat313 - September 27, 2010, 10:10 am

its totally clean..but when i build the keylogger it has been detected to my AVIRA :(

silverhunk - September 27, 2010, 10:20 am

thanks its clean and not detected by kaspersky?

DDOS Kfnx - September 27, 2010, 10:22 am

Thank you, but... How do I get to actually see what people have typed? ...

(I'm new too)

nejnej - September 27, 2010, 2:13 pm

Why do I get this? I cant get the server.exe , when I build.

It says access denied to the stub.

Anyone who can help?

silverhunk - September 27, 2010, 10:52 pm

(Sep 27, 2010 10:22 AM)DDOS Kfnx Wrote: [\[CITE\]](#) Thank you, but... How do I get to actually see what people have typed? ...

(I'm new too)

a log will be sent to your email. It contains people what have typed and a screen shot of their monitor (it depends on keylogger if it support screenshot)

CrnogorskiHaker - September 28, 2010, 2:55 pm

Ok, I'm a total noob regarding keyloggers. In fact, this is the first one I wanted to try.

I downloaded the keylogger (using your ad link you damn ####\$:)) and I extracted the files.

I built the server.exe but I'm not sure what should I do next.

I know I should be reading the basic info regarding keyloggers but I want you to explain me based on THIS example.

From what I've read in some of the pages.. I should send the server.exe to the victim? And the victim must run it? And after he/she runs it, the keylogger will remember the info he/she typed and it will be sent to my gmail account I've put over there?

If so, I wanted to know what kind of info is sent to my e-mail address? Everything the person types? Only the login information? How often is the information send to my e-mail address? Immediately? Daily logs?

Thanks in advance for helping a keylogger-noob :)

?nxy - September 29, 2010, 6:47 am

I'll download and add it to my collection :) Nice keylogger.

f3nom - September 30, 2010, 2:43 am

nice job dude ;) it is simple and it works

matice69 - September 30, 2010, 4:59 am

unfortunately nod32 recognizes it! :(

Ollielcon - September 30, 2010, 2:26 pm

Help please :)

It says that the Stub.exe is denied when i press build and this comes up to under Details:

See the end of this message for details on invoking just-in-time (JIT) debugging instead of this dialog box.

JIT Debugging

To enable just-in-time (JIT) debugging, the .config file for this application or computer (machine.config) must have the jitDebugging value set in the system.windows.forms section. The application must also be compiled with debugging enabled.

For example:

```
<configuration>
  <system.windows.forms jitDebugging="true" />
</configuration>
```

When JIT debugging is enabled, any unhandled exception will be sent to the JIT debugger registered on the computer rather than be handled by this dialog box.

Rampant - September 30, 2010, 2:27 pm

Nice GUI ! i'm gonna download it soon thanks ! :)

-Exiled- - September 30, 2010, 6:34 pm

is this a good one or not anyone know?

Battleman - October 6, 2010, 11:16 am

NOD32 has detected it. :)

Quote:06.10.2010 ? 21:19:11 HTTP filter file

<http://dl.box.net/dl/412002044/f03279c85d0e19e8546d743058809813?a=b190e26c54ea7ea5c960f559bd6d2abc&m=168566327,11211&x=1&c=425ba273a73acf24ac2c60ae00697401>

Win32/RiskWare.CrackHackLogger application connection terminated - quarantined. Threat was

detected upon access to web by the application: C:\Program Files\Opera\opera.exe

paranOid44 - October 6, 2010, 11:32 am

works nice.. thanks for this !

Makinki - October 6, 2010, 3:40 pm

I'm new here so does it work or not plz reply cuz I am new and some help would be much appreciated cuz all I know is some basic cmd tricks

fireater - October 7, 2010, 5:03 am

(Oct 6, 2010 03:40 PM)Makinki Wrote: [\[CITE\]](#) I'm new here so does it work or not plz reply cuz I am new and some help would be much appreciated cuz all I know is some basic cmd tricksI think you should take some time to read all the replies in this thread.

And please try it out for yourself.

Cheers

CursedPX - October 7, 2010, 11:22 am

Nice GUI !

I will test it tomorrow ! :)

nuzhat - October 7, 2010, 12:27 pm

Is it works on Vista and 7? is it still fud?

IVludKipz - October 7, 2010, 4:07 pm

Hey great logger :D got like 5 people already but...
It would really help if it had a stealer in it :)

antrandom - November 8, 2010, 11:35 am

looks good will try...thx for share

Vafliis404 - November 8, 2010, 12:49 pm

Huh , vouch for this guy. Tested it , works nicely. I don't use loggers anymore but still nice work. ?
cheers.

Sheephead24 - November 8, 2010, 1:08 pm

Didn't work.

Kept on saying error even when I made a new account and I tried everything.

hardip - November 8, 2010, 2:15 pm

I'm trying it now, thanks hopefully it works.

?nxy - November 8, 2010, 4:32 pm

Nice release, I will try it out ^__^

+Visual - November 8, 2010, 4:39 pm

Love it works like a charm!! thnx

fearlesskiller - November 9, 2010, 3:57 pm

But does it take all key strokes only of your computer

mastchio - November 10, 2010, 9:04 am

doesnt send me a email o.o

Galaxy Wave - November 10, 2010, 9:06 am

Very Nice keylogger, thank you for sharing it.

eriaga - November 10, 2010, 9:20 am

nice, keep up the good work

adampelletgun - November 10, 2010, 9:26 am

the actual program is detected by norton

sunilbabu1252 - November 10, 2010, 10:16 am

i understand your problem and i will help you..

Kosty - November 10, 2010, 10:49 am

I did everything right the Gmail was valid(I pressed test mail.) I opened the file i have "build" I tried to typed something .. I didnt get any mail.

xieroxx - December 10, 2010, 12:16 pm

Just as you know it:

I made a server, and tested it :

File information

Report date: 2010-12-10 21:15:55 (GMT 1)
