Thread: [\(Help\) Visual Basic 10 Form Filler](#)

GoofyMan2 - June 13, 2014, 4:22 am

Hello guys i'm just starting to get into visual basic and i'm creating a form filler and I need some help with this. Pretty much i'm trying to make visual basic pick different emails to use each time it going's through.

Edit:

here is the current formate it usings when getting up to the email part.

What I need is each time I open the program it picks different emails each time it go's through.

Josh? - June 13, 2014, 4:39 am

Pretty sure you need to set "checked" to "true", but don't quote me on that.

GoofyMan2 - June 13, 2014, 4:40 am

Can you please explain that though a bit more please proddy.

+Haze - June 13, 2014, 4:42 am

```
WebBrowser1.Document.GetElementByld("").SetAttribute("checked", "0")
```

GoofyMan2 - June 13, 2014, 4:44 am

This is my error I get when debugging: <http://scr.hu/1pj7/nbex4>

+Haze - June 13, 2014, 4:46 am

thats because checkbox is not an ID. just use google to hep you

Josh? - June 13, 2014, 4:52 am

```
WebBrowser1.Document.GetElementByName("pse_216_resident").SetAttribute("CHECKED", "0")
```

No idea if that works. :D

GoofyMan2 - June 13, 2014, 4:56 am

I get a error when attempting to do what you said proddy. <http://scr.hu/1pj7/0g2ca>

+Haze - June 13, 2014, 4:57 am

<http://howtostartprogramming.com/vb-net/vb-net-tutorial-49-click-button-without-id/>

Mr.Steven - June 13, 2014, 5:12 am

Here's the code buddy:

```
Code WebBrowser1.Document.All("pse_216_resident").SetAttribute("checked", "1")  
That will tick the checkbox.
```

Wouldn't it be easier to use a WebClient instead of a shitty IE engine thing?

If you're going to use a webbrowser, at least use Gecko or something instead of crappy IE.

GoofyMan2 - June 13, 2014, 5:15 am

Thank you Mr.Steven it works great now.

Mr.Steven - June 13, 2014, 5:17 am

Keep in mind though that using the default web-browser is often not the best solution, depending on what you want to do, you might want to use HTTPWebRequests so when you have time, look it up.

If he can't manage WebBrowsers I don' think he can manage WebClients :/
