How much DDoS Protection can your servers withstand?

And what are the locations?

As of right now, should only be 120GB. I am however busy with my coder on upgrading that. As for

location, right now the locations are the Netherlands and New York. As well, busy on getting more of those.

Vin Derp - June 13, 2014, 3:53 pm

Should be. Like I said, we just got up, so we're sort of in beta stage. I am busy on getting proper and strong Ddos protection. Just have to wait for my coder to come online.

Yes, working on it. It's cause I haven't created the map itself yet, I'm busy with my coder on getting that fixed :)

Seems as your New York server is down?

Not sure, but I am able to connect to the Netherland Server, so it has to be down.

I would like to vouch however, while I was on the New York server people were trying to DDoS me, probably like 1-2 times I lagged only a little.

Good DDoS Protection brother, I would recommend you get more of it though, people are thirsty to hit you offline.

@guycheap I was referring to the DDoS Protection, I don't lag while I'm gaming on Xbox because of the server location, I live in Chicago, so I don't have to worry about that, it's just the Gb/s the server can withstand.

No, ofcourse there's no malware in it, lol. I'm selling a product here. ?

It's a small .zip with .exe's in it, which is usually the case with malware, that's the reason Antiy-AVL says it might contain malware.

I have scanned the client itself for you, which can be seen here:

People of SeriesVPN, you guys have done a really good job and the client works like a charm ? Keep it up!

Regards ?Hihi thanks, glad you like the VPN! :)

I see you get some good speeds as well, seeing you're from Holland it's normal to have practically the same speed on the NL server, and a lot lower speed in NY.

Thanks for the images! :)

Hello,

I use the VPN now some days and I am very happy with it. There is a Uptime of 99,9 % and a autoupdate :D

There is a friendly skype support. What would be nice for the future:

- A button Next Location
- A autoreconnect. // autoconnect
- A add to autostart
- Something to unblock Hackforums. (Hackforums is blocking some ips but not all :D)

I buy a lifetime account.

If you need a VPN buy it :D GLWS

Paul

Thanks a lot for your suggestions. Great that you're really enjoying the VPN!
The autostart can be done already though, just need to click one button.
Unblocking HF is fully functional as well. Feel free to create a support ticket if you want, I can help you.

Wish I could get this working.. I've tried heaps of times to reconnect after wrong password and still says the same thing

Boomboxes - July 10, 2014, 2:39 am

If you're having problems with the VPN, please create a support ticket. I usually respond in less than a few hours.

Right now, all issues have been fixed again. The FreeRadius server was not responding for a few hours, which made all the servers non available.

I'm honestly really impressed with this VPN service. The customer-support is excellent and fast. The VPN has incredible up-time and I have yet to be disappointed. Sometimes I even forget I'm using it,

since it's a lot faster than most VPN's I've purchased. Definitely vouch.
