Hah, I'd love to see you try and setup a VPN while everything is automatic. It's not as easy as it sounds, this isn't an option for those who'd rather save money and I'll be blunt about it that's good. This is an option for the inexperienced and luxury people who don't have time to spare. Reality.

There are actually a lot of guides that tell you step by step on how to do most of it. I'm not saying that this service is a waste of time because if you don't know what you're doing:

-> You have to have some linux knowledge, if you don't then you'll be wasting your time

- > You can screw things up very easily and that'll just cause massive problems in the future.
- > It takes time, and if you don't have time you might as well pay someone like guycheap to do it.

In saying that though, if you don't know how to run or set up a VPN then you shouldn't really be selling one anyway.

What a cocky answer. I know how to use linux and I bet I can setup a fully working VPN service (without automated portforwarding) within the hour. If you want customers, you're going to have to have some respect towards them.

I meant it in a respectful way, if your too negative to think about that kindly keep your thoughts to you. I'm not cocky I was explaining reality, those who are less fortunate try harder to achieve something therefore they try harder to setup the VPN, the rich don't need to this is life's example not a VPN services.

hey man i am interested in this could you please pm me and we can talk about setting one up. it would be great thanks

skript jonson - October 13, 2014, 2:23 pm

Vouch, I just had my service setup it was about 3 or 4 days to setup and there were a lot of problems in it but in the end everything turned out perfect and even better than how I expected it to happen. A lot of problems consisted of the companies that were being used but that will not happen for all for the most part its my fault for picking the company but Guy was patient through it all and ended up having it all setup perfectly in the end. I would recommend this service to a friend who needs a VPN setup, seriously, great job.

Yet you put me on your ignore list ?

Well here's my response anyway, have fun.

Quote:A wise person would thank someone for correcting them, an ignorant one would be offended. I just helped you with your English and you're getting mad at me.

You clearly do care about making money as you took the time to make customary private messages and change them around for each person, and you did it for "multiple" other people. I don't know if you're trying to offend me by saying I sell eBooks because i'm not getting offended at all, in fact there's nothing offensive about what you say.

I make money doing way less work than you, i don't think that's a "hah".

But listen mr Tahir, i'm not here to start an argument. All i'm saying is that i'm not interested in your product, instead of wasting your time getting mad at me for it, move on to other people and see if their interested... because i'm not.

I put you there for a reason.

Great response you deserve a prize for this one ?

A wise person would be happy if the person corrected them in a respectful manner. An ignorant person would do the same.

I clearly do make custom private messages but at least I'm putting in some effort I don't see anything wrong with that.

I didn't PM you for an argument either but the fact that you started to swear and responded in a rude way had something to do with my outbreak.

How much a month does the vpn service cost after you set it up? and how many locations are you getting with this?

JewishBotter - July 20, 2015, 6:03 pm

will be contacting you soon :) service looks promising :)

Hey Everyone,

It's been a long ride, it's had its ups and downs but I loved doing this. I learned so much from this project from the starting all the way to the end there's always something new that I learned while doing a setup. Unfortunately with my ever changing time schedule it's best to send a farewell to this project. I'd like to congratulate [Dan Smith](#) on his purchase, from now he will be dealing with everything VPN related. I've taught him everything and it's his project now. Farewell VPNMen it was a fun ride!
