If you can boot it offline I will give you \$20 BTC.

I just upgraded the DDoS protection. PM me with proof that you are booting it and that it is offline and I will give you payment.

Let the games begin. :)

Vouch. Cyber owns a pretty rad server. I doubt anyone can knock it off though.

Thanks bro, I appreciate the vouch.

I'm looking to get this thoroughly tested and I doubt anyone on this site can boot it offline.
