Changelog

Spoiler ([Click to View](#))

6/14/2014

- Development starts
- Login/Register mechanics finished
- Basic rolling game finished

6/15/2014

- Captcha implemented into login
- Donator system is now in place
- Affiliate system is completed
- VIP 3x output added

6/16/2014

- Beta stage started

.Matt - June 14, 2014, 3:23 pm

I'm running this with Oblivious and Fade! Get those free Omnicoinz guys.

ItsATumor - June 14, 2014, 3:24 pm

Ouuu shiny. Another place for free OMC. Thanks and lets see how this one turns out.

Obli - June 14, 2014, 3:27 pm

Yeah, we're running this. All credits go to Matt, he put a lot of hard work in this.

Neat? - June 14, 2014, 4:20 pm

Really nice and sexy theme :)

But, I can't reach the "roll" button :p

Hmm, Wierd. I've removed the footer until i can find a fix for this. Just so everyone knows, the current rolling method is only temporary and will be changed to a much more fun method when i get the time.

webdev77 - June 14, 2014, 4:24 pm

I had the same issue with Chrome, but I just hid the footer temporarily and was able to click the roll button.

What do you mean it bothers you? For me personally it's because i haven't really considered buying it. I was going to buy it a while back but when Omniwallet got hacked i lost 14k omc.

I find it not appealing. I do not need to prove that I do have OMCs, but I can show you my AllCrypt balance if that is okay with you? If I had 10 BTCs, does it mean that I should have the bitcoinage award?

I disagree. Once an hour to get free money ain't bad if you ask me.

Also considering 1 OMC is worth 900 satoshis and your average BTC faucet gives away 200 satoshi per hour i would say we're pretty generous.

Hats off to Matt for coding it. And of course to Oblivious for funding it. You too Fade.

Will you guys use a referral system?

It's a bit unfair though, as the first ones to arrive get all the refs.

Sent in what looks to be the first donation, of exactly 100 OMC.

Lol, your timer goes into decimals!

Thank you so much for the donation! You have been added to the donor page. I'm going to fix the timer thing soon when i get a chance. Trying to find a easy referral method atm :)

I agree with the referrals point but i may put my own little twist on it to make it more fair for all members.

Sorry about that Hurr. I'm a retard and Fade copied me :P

We're considering creating donator systems or other features as seen in the other faucets. Would anyone be interested in this?

Edit: Donator system finished :P

Edit2: I want the referrals to be different so how about each refferal you get reduced your roll delay by 5%.

Meaning, 1 referral means it's 57 mins 2 makes it 54.15 etc etc etc

Referral system will go as follows:

For each referral you will get 5% less time per roll but one minute added ontop of your overall time

afterwards.

EG. $60 \text{ mins} * 0.95 = 57 \text{ mins} + 5 \text{ min} = 59 \text{ mins}$.

The +2 is needed so that the system can't be infinitely cheated to get 1 second rounds. The minimum time per round would then be 40 mins. (may make less)

That's a good idea and concept but off course there will be a limit but doesn't that also mean that there will be a limit for people to refer others? When you reach your min. roll time what benifit remains?

Or will you do like a double reward? - time and +% earnings?

Poison.

Favicon changed and captcha added to the login page. No captcha for registration at the moment as i don't really feel its needed. You have to login after registering anyway and two captchas is just a bitch.

I implemented captcha in 10 minutes, it's so easy anyway. It's not really a concern though, because sure, it can be botted, but you still have the time limit and I don't think anyone is going to bother making a macro for it when they know captcha will come at some point.

There are three things you can try;

1. Reset your DNS:

open CMD --> type in ipconfig /flushdns

Retry the site

2. Try accessing the site from the opposite protocol.

EG. Use www.omc-faucet.com instead of just <http://omc-faucet.com>

3. Try using a VPN;

Most VPN's make you use their DNS which will allow you to see the site until your ISP updates the DNS which can take up to 24hrs.

Viewing rolling page when not logged in

Spoiler ([Click to View](#))

And

Spoiler ([Click to View](#))

And also you should really set PHP to not display errors and log them instead.

Also not to hate on the project, but this really seems like a direct copy of OmniFaucet.net. I mean same donators page, same rolling page, same VIP idea, same name at launch, and even the payout ranges are exactly the same as OmniFaucet had. That can't be just a coincidence.

Don't get me wrong, it's a good thing to have multiple faucets for OMC and I like what you guys have done, just try to be more creative and original about it.

(Jun 16, 2014 08:59 AM).Matt Wrote: [\[CITE\]](#) If you had spent half the time to read through the thread as you did posting this you would realise that the site is a direct copy. It's only temp that it is tho. I'm still developing our game and wanted to get it up and online and tested sooner rather than later. Please don't claim any of the ideas as you're own as that's just bull. Your site is just a copy of every other faucet. The fact that we had those features means that we copied any other site. PHP errors are being fixed right now. I forgot a simple line of code.

Not trying to be mean about it but saying that it's your features just kinda struck a nerve. - Donation system is being removed as we speak as i don't actually like it.

I actually did read through the thread and I didn't see anything about it purposefully being a temporary copy of our site. And we didn't base any features of our site off others (Except for the rolling). We just made what we felt was needed. The only thing that other faucets might have is a donators page or VIP. It's just the fact that your faucet has exactly the same combination of features that ours has.

And a heads up to everyone the site is back online.

.Matt - June 16, 2014, 9:22 am

I really don't want to fight about it man. Donator stuff is going away anyway. Rolling is being changed. The mistake in the thread design was due to fade.

Also if you are interesting in setting up auto payouts to save yourself time, let me know. I'd be glad to help.

Sorry about all that;

Update for the 1000th time in the past two days:

Referral system updated to now make sense! Now for each referral you will get 2% less waiting time and this will continue until the minimum waiting time is reached of 40 mins.

Just want to make you guys aware that all IP's are logged when registering. Any duplicate IP's will result in an account suspension for abuse of the referral system. Already locked 8 accounts.

Also not to hate on the project, but this really seems like a direct copy of OmniFaucet.net. I mean same donators page, same rolling page, same VIP idea, same name at launch, and even the payout ranges are exactly the same as OmniFaucet had. That can't be just a coincidence.

Don't get me wrong, it's a good thing to have multiple faucets for OMC and I like what you guys have done, just try to be more creative and original about it.

Hello. First of all, do not take what I will say as an offense, this is not my intention.

Same donators page? What do you expect us to do? The infrastructure of the page is more than common on many, many faucets. Do not try to say that you invented it.

The VIP idea is, again, well spread on the internet. We just adapted it as many other faucets.

The name at launch was a typo made by Fade. The site is called OMC-Faucet. Yours is OmniFaucet. Now, OMC is omnicoin, Omni is Omni, where is the resemblance? We had quite a few names in mind, omc-faucet sounded much better.

The payout ranges? Did you give out 3 OMCs per roll or more? What was the base reward for each roll?

The rolling system is an idea Matt came up with when we were discussing on Skype.

In fact, the faucet has been developed in 12 hours or so. Your faucet was down, Matt and I know our way in OMCs so we naturally have a lot. I have 12k at disposal for this faucet, we did not bother registering on your faucet (which was, again, down) because our goal is to give, not take from others and give the said omcs to ourselves.

Now, you come here and tell us that our faucet is a rip from yours? I have exposed my points. We

do not need to style on anyone, the faucet was custom coded, most of the features can be found in other faucets. VIP and donation pages are common stuff in any faucet.

Your last point is why i'm changing to my own method of giving coins. I want it to be a fun and new experience for users.

P??sonl?af - June 17, 2014, 12:25 pm

For me it's all the same, we all support one goal and that to support OMC and devide the coin into the community.

But a roll faucet is a roll faucet none has to point any fingers at anyone for 'originality'
I'm pretty sure once my Alpha comes live I will have 'invented' things that both of you want.
