Thread: [\[MyBB\] Custom Coded Unique Marketplace Plugin - Forum Owners Come!!!](#)

Arcady - June 14, 2014, 4:17 pm

I have for sale a 100% unique custom coded plugin for current MyBB version. It was coded by a well known MyBB plugin developer known as "Yaldaram". It was purchased roughly 6 months ago and has not been sold/used on anything yet. I no longer need this for the project I had in process and wish to get some money back. I am only willing to sell this a few times to keep it unique to those who purchase it so I am looking for a decent amount of money each sale. I will not even acknowledge lowball offers so do not even waste yours or my time with it.

This plugin will come with all required files for a smooth installation and I will provide a couple small alteration information for a few things I wish to used that were not originally implemented into the core version.

Information About Plugin:

Like I said it was coded by a well known coder. It was going to be used to get away from the thread/post hungry forums that use standard buy/sell threads. I wanted to have a unique custom marketplace with many admin/user features to make a great experience. It has many unique features such as adding the categories for whatever you wish, restricting view of certain categories(addon), keyword cloud for easy searching, buy it now, PM notifications, bidding, etc. I could go on all day about it but it is best to just provide a live demo for it.

<http://www.guildgamer.com/market.php>

You can register an account and it will be instantly activated so I encourage you to use a gibberish email just to browse the plugin. I will not provide admin access unless you are VERY interested and then we can discuss it further, which I would give you a limited admin account. (I am aware of admins uploading a corrupt theme to upload a shell and have full access to the files).

Please direct all questions/enquires here so others can also get answers and if you are a serious

buyer then please PM me and we can discuss further. I will be only accepting Paypal as a payment option as I do not wish to exchange any other currency. And the PayPal purchase will be sent as family/friends.

Thank you for looking!

Also, Please do not be like this guy..
