Method - 8.5/10

Reasoning: It's a solid method that can be done and if done right can be effective. No investment is needed and I've never seen this method before.

Grammar - 9.5/10

Reasoning: There were as many spelling errors that I caught that you can count on one hand. And they're nothing major, so no big deal unless spelling is an ocd type thing for you.

Method Use Efficiency - 9.5/10

Reasoning: This method can be done by anybody with a cpa account of offers and if you put in the correct amount of time and work autopilot will kick in after a while.

Overall - 9/10

Reasoning: This is a good method that I haven't seen before and it can do what is advertised if you follow the ebook. So, therefore you will make back what you spend on this ebook easily and more. There are pictures and great guiding to help you along the way.

I have updated the eBook today, and I am selling again. I am only selling 4 copies. Once they are gone, they are gone. No exceptions.

Time? - September 12, 2014, 8:26 pm

Selling this again. The eBook has been updated with general updates.

Time? - October 7, 2014, 2:47 pm

I have added more features to the eBook. With that being said, I think this may interest some people.
