OP, I recommend removing the profile links and just having the names. Then people can use the search function and find the user, if they want it.

Here is the search function:

Shockley - June 17, 2014, 9:17 pm

You can get rid of the error by shortening the months to their shortenings (February -> Feb.), or you can just remove the month in general and just do the number as obviously if it's under the picture "February" than it's a Feb. birthday.

Sir - June 17, 2014, 10:18 pm

You forgot to link these 2 usernames:

criticfail - December 19th

Hal Jordan - April 30th

To fix the error of not having enough text space in the OP, make the images of each month with the birthdays below them in photoshop. Then in a separate post in this thread, list the birthdays for each month individually. Then Link the images to the post. Example:

January Birthdays Design : Links to post #XXX

Click it

Shows the Birthdays with usernames linked, etc.

February Birthdays Design : Links to post #YYY
Click it
Shows the Birthdays with usernames linked, etc.
