Ever want to make your own RPG on your computer?

Humble Bundle is offering a 'RPG Maker' suit in their weekly bundle for \$24.99. Normally all the software and free games would cost you \$369.99 if you bought them directly from stream. I personally picked up 2 copies of keys to put on multiple computers for indie dev.

\$24.99 gets you:

RPG Maker VX Ace
RPG Maker XP
Game Character Hub
DLCs... too many to name!

Games:

To The Moon
Deadly Sin 2
Legionwood 2
Skyborn
Sweet Lily Dreams
