Tizen - June 16, 2014, 10:11 pm

Hey, I'm interested in abusing with you.

Now, I'm not really a bug abuser per say; my experience comes with Java. I'm always looking for ways to exploit servers, may it be packet forging, fake requesting, whatever. Most of my work is behind closed doors, as I do not release my most precious exploits.

However, recently I've released one of my most recent exploits. This exploit used a complex way of sending connections, and in doing so, this completely crashed servers, ran them out of memory, nulled all the player files, and made the server completely un-playable.

I included a video that I whipped up quickly to demonstrate what happens when you run my exploit on a server: <https://hackforums.net/showthread.php?tid=4287067>

So yeah like I said, my abusing is more technical then just finding bugs, however I have some experience with that too.

Strictly talking bug abusing; Being a server owner and developer, I can quite easily spot a potential bug when I see one. Many times I have gone onto other servers, found a major bug, and reported it to the developers of said server. I can apply myself to different situations, depending on what the activity we're trying to abuse includes. I know patience is key with bug abusing, and trust me, I have a lot of experience in being patient.

Let me know :)

SaineGenz - June 17, 2014, 12:42 am

Im not experienced at all im just an old school player buti quit! GI finding though!

ChingChang - June 17, 2014, 2:25 am

As much as i'd like to bug abuse with you, I don't have enough skill in it as i've never done it before, however I would be very dedicated to it.

Lil W?yne - June 17, 2014, 6:09 am

Hey Zeb good luck on your bug abusing. you plan on hitting the big ones? I still have a vendetta on soulsplit for banning me for that instant duel arena win glitch. Been trying to get unban for like a year because I have 100b in items on my account lol.

Bonfire - June 17, 2014, 7:15 am

I had a period of time when I bug abused a little bit. I'd say when it comes to bug abusing, I'm low-medium experienced. I've talked with you numerous times before, and I may not be of much use to you, but if you need someone to tag along with you I'm always available.

I have a little bit of proof of me bug abusing, which are available upon request through PM.

VGM2021 - June 17, 2014, 7:18 am

Im experinced in duping/bug abusing and exploiting. I know how to use Cheat client and Im an accepted member on RSPunit if that means anything :P

Two big servers I've duped on are Ikov and Roat-pkz.

What will be doing anyways?

?lixir - June 17, 2014, 8:27 am

I think you should go ask Toil and his cult for a bug abuse team ;)

Toil or even Haci ???

Constable - June 17, 2014, 9:41 am

Hit me up, Maybe I can make up to you :)

No. I haven't been on BA since early 2012. I thought it was dead anyway.

NoSuchAgency - June 17, 2014, 12:15 pm

There are very few skilled bug abusers on HF. I'd recommend contacting Constable, Happyflap, or PFM.

I'd offer to bug abuse with you, but I don't really want to bug abuse currently.

Decentral - June 17, 2014, 4:43 pm

I don't know how to dupe but if you want to teach me how to do some dupes I'd be fine. I've done some glitches with the dspear special attack before and gotten people trapped in areas you would have to noclip to get to. Only bug I've done though.

The Plague Doctor - June 17, 2014, 7:29 pm

I was admin around that time so that's weird lol.

No you're bad you can't even bug in real rs m8

Hotbeast123 - July 6, 2015, 6:55 am

I can help help bug abuse with you. I have found many dupes on 718 revisions of rsps'.
