Thread: [Running out of PM space in hackforums.. HELP..!](#)

justdidit - June 17, 2014, 3:53 am

Hey I am running out of my PM space I have cleared all my messages but still I am not able to clear it though. Please tell me what should I do now to clean up my messaging space ?

Go to your trash can and empty it. All removed PMs go there. After removing them from the trash can, you will make room for new PMs.

Hope this helped you out. ?

In the pm section, at the top look for empty folders. The best option ever.

Go to your message box and hit empty, <https://hackforums.net/private.php?action=empty> then you should select trash can, all gone after that.
