Thread: [How do I display a section of my screen on another monitor.](#)

Dollaz - June 17, 2014, 10:23 pm

Basically the title. I found this program: <http://www.actualtools.com/multiplemonitors/>

But I cant figure out how to display the area selected on my other monitor.

You only want to display a certain part of your main monitor on another one ? Like a zoom-in ?

Pretty sure he's talking about the mirroring option in the program.

http://www.actualtools.com/multiplemonitors/features/multi_monitor_desktop_mirroring/

If that's the case you should be-able to select the section you want, then choose the monitor you want to sent to (if you have more then just two monitors).

It looks like that's exactly what the OP is trying to do.
