cytonwider - June 19, 2014, 4:38 am

Otorinolaringologija

"Otorinolaringologija" begins with "O" and ends with "A"

-> OA is the ICAO Code for Afghanistan.

Afghanistan has 11 letters, but as it's one word, subtract 1 and you get 10.

Illumanti has 10 letters so matcherino.

Manflower

That's simple.

Manflower contain the word flower.

There is a flower called "Hibiscus Illuminati":

"Mustafa".

"Must" signifies the Illuminati's need for NWO.

"afa" could be simplified to "have her" in a British accent, which means the Illuminati is British, and must have the Queen.

Eminem's famous hip-hop/sacrifice/Illuminati song, 25 to life.

It's like a prison sentence, 25 years, or the number 25 itself.

December 25 is Horus/Lucifer's birthday. That is why there are so many sacrifices on this day.

The Sum of the numbers 2 and 5 equal to 7. On June 25th, 2009, there were 3 celebrity deaths. Writing these numbers out as digits gives us $(2+5)(2+5)(2+5)=777$.

777 is part of the 11:11 phenomena and as we have already seen, the number 11 was key to the September 11th attacks on the World Trade Center.

Illuminati planned all of this from the beginning.

matcherino = Illuminati

Here is proof.

As the largest known protein, titin also has the longest IUPAC name. The full chemical name, which starts methionyl... and ends ...isoleucine, contains 189,819 letters and is sometimes stated to be the longest word in the English language, or any language.
