Thread: [UnOfficialCryptic's Doxing Tutorial - Simple/Basic and Short Tutorial](#)

Psychogenic - June 18, 2014, 10:41 am

Only perform a dox if it's necessary. Doxing is not a game. You're responsible for all actions on all counts. Don't fuck up.

Links

<http://www.pipl.com> - Can be used to obtain an email or username.

<http://www.tineye.com> - Reverse image searching.

<http://www.lullar.com> - Information tied to having their email.

<http://whois.domaintools.com> - Basic GEO IP but works well.

<http://www.ip-address.org/tracer/ip-whois.php> - Another GEO IP/Who Is

<http://www.iplocationtools.com/> - Another GEO IP/Who Is (My favorite because it's more accurate)

<http://www.findlatitudeandlongitude.com/find-address-from-latitude-and-longitude/> - Easily convert the latitude and longitude to an address.

<http://www.blackbookonline.info> - Illegal activity lookup.

<http://www.whatstheirip.com> - IP Logger.

<http://viewmy.pm/google/> - Google redirect exploit.

<http://resolve.me.org/> - Skype Resolver.

<http://knowem.com/> - Lookup for username on multiple platforms.

Getting the IP

This is more than easy nowadays. You can use multiple tools such as a Skype resolver, IP logger, Wireshark (to sniff the IP), etc. which is all provided from the links above.

Grabbing the Info

The most common used method of grabbing one's info is using their IP address and performing a simple GEO IP/Who Is or geolocation and ISP information. That can be done using the sites provided under "Links".

Websites linked with their Skype

You aren't going to find their real information just from their Skype but you can find websites attached to their Skype leading up to that. The easiest method is by opening up Google and searching for "Skype:SkypeNameHere".

Ex: You want to find information regarding "echo123" on Skype.
Just Google "Skype:echo123" (no quotations, obviously)

Grabbing their Email linked with Skype (Facebook Method)

As this may not be the easiest, it sure is pretty common. Basically, you create a fake Facebook account, go [here \(click me\)](#), link it to your Skype, and click "Find Friends". Once you've finished that, the best bet is to just use CTRL+F (Find) and search for their Skype name. If one is to link their Skype to their Facebook, you can now investigate their Facebook profile.

That's really all you need to know about doxing someone. The only really useful information are their Skype, IP Address (which is extremely easy to obtain), and their email address. Thank you for taking the time to read my tutorial and I hope you've learned from it. ?

Elixirz - June 18, 2014, 10:44 am

Great tutorial, and very useful. Most common question have been answered here as well. Good job with this!

Psychogenic - June 18, 2014, 11:11 am

Thank you, bud. I appreciate the feedback. ?

Serbia - June 18, 2014, 4:23 pm

That's wonderful. I'm going to bookmark this for future reference <3

disguided - August 4, 2014, 1:43 pm

nice collection dude, thanks for this...

Jake Miller - August 4, 2014, 5:24 pm

Last part is pretty outdated and was patched, nice collection tho.

I see it's an old thread, no wonders it had an patched part.

Unauthenticated - August 5, 2014, 8:13 am

Ima post, who knows, not into serious dox, but I might need this one day, thanks for the share OP, post is HQ

P.I.M.P. - August 6, 2014, 11:24 am

>Only perform a dox if it's necessary. Doxing is not a game. You're responsible for all actions on all counts. Don't fuck up.

Is this like, the new version of a "Usage rights release"? No, you ARE responsible on the actions followed in this tutorial, when you allow them to dox "only if it's necessary"

Jake Miller - August 6, 2014, 4:22 pm

I agree that It's not a game and you should only do it if highly neccesarily; BUT as far as I'm concerned sharing personal information isn't illegal as long as you don't share SNN numbers or W/E it's called.

Th3PonyWizard - August 6, 2014, 4:27 pm

In my country, that's completely illegal (Posting blocks of information including real life connections, etc), considered as direct privacy intrusion and publication. Even if, I see fit to have a proper "it's not my fault" part.

Dean Winchester? - August 6, 2014, 4:29 pm

Thanks for this.

Posting to find this for future uses ?

Jake Miller - August 6, 2014, 4:32 pm

In denmark it isn't, neither in the US I believe. There's being posted information each second what exactly would they do?

Prolink - August 12, 2014, 11:23 am

Great basic tutorial, there are some other websites I could definitely recommend but it's a clean thread.

DrBlurrHD - August 12, 2014, 9:49 pm

Thank you so much for these links. It truly does help me DOX skids that need to be taught lessons in this virtual world.

SlacKardx - December 19, 2014, 1:26 am

I need the full name and adress of a person, but all i got is her city, kik username, where she goes to school and some pictures.

Is it possible to obtain this info? I will pay alot.

It can still be outdated even if he just uploaded it now...

Doxing is not a game. (Doxing is more the lulz)

Bladefang115 - December 21, 2014, 7:35 pm

pipl.com

not working. help plz

!!!

Mysterious101 - December 31, 2014, 7:41 am

Thanks you for the Tutorial !

I had try all this website before, but it didn't work ! :/ And i have read that some of this websites are only for US :/

How wrong can one person fucking be? ???

RootsLurker - December 31, 2014, 9:37 am

Thanks for this, great for beginners learning the Ropes, currently learning myself:)

Sometimes though, Skype Resolvers dont work for me and i dont know why?

Anyways, thanks again

~Roots

realrbn - December 31, 2014, 1:34 pm

OP doesn't know shit about Doxing "That's really all you need to know about doxing someone. The only really useful information are their Skype, IP Address (which is extremely easy to obtain), and their email address." Says it all. Are you retarded Mate?

NoScript - January 3, 2015, 8:42 pm

??

Doesn't seem like that bad of a tutorial, But I would most definitely update some of the things in this tutorial.

AtherisViper - January 12, 2015, 3:44 am

Very usefull tutorial, helped a lot.

ScarletCobra - January 19, 2015, 2:00 pm

This is very useful to me. I'm just a beginner. Thanks!

al-Saher - June 23, 2016, 11:37 am

Definitely will be looking into this, thank you!

'originalmobz - June 23, 2016, 1:58 pm

OP you forgot spokeo. Spokeo is a great tool for searching information. I can provide login to anyone who wishes.

HeyWannaTeamUp - June 26, 2016, 11:29 am

Thank, man! Bookmarking for future reference.

Meow - June 26, 2016, 4:07 pm

You should update skype resolver link, nice tutorial anyway!

tr1ck - June 26, 2016, 4:44 pm

very well done Thanks!! helped with some sites that a lot of people don't know about!

cu_123 - June 28, 2016, 9:39 am

Not gonna do right now but the tempting is real after reading your tutorial. I am sure to bookmark

this for later use. Thanks alot OP

CarbonBasedHax - *November 30, 2018, 1:46 pm*

Very cool thread, helped me remove some of my online info => Thanks
