I just cut it into cubes and put it in a bowl... so much easier than what he showed

I hate this guy.

He just googles around then makes a video about whatever he has read.

His voice is annoying. I want to die,

I don't see a point in this thread. This guy is super annoying and doesn't know anything. But then again this is just my opinion so oh well, lol.

it's pretty cool.

Personally I like his videos. Why not google then show on youtube? Some of his videos are still interesting, his optical illusions one is pretty good. This video however was a waste. It takes less amount of time to just cut it in fours then just eat it like it is then to do what he did and plus putting it in squares would make it more work but I might try that it actually sounds fairly good. ?

It's really hard to understand what he says.

Anyway, is it really worth it to waste time doing this? I've got no problem with getting a little water on my face.
