Any customers FEEL FREE to PM me suggestions and if I seem interested I'll gladly implement it .

Yasuđ - June 19, 2014, 11:42 am

A very great coder, keeping things private to hold it long time FUD, 100% trusted as fuck, never seen so good JDB before! Nice options thooo. He almost know every language, great coder.

Hacktech01 - June 19, 2014, 11:57 am

The tool seems cool, nice thread design. Are you giving out any vouches? If so i would gladly take a vouch :)

Good luck with the sales mate! ?

Yasuđ - June 19, 2014, 12:54 pm

Can't both be true?

m4dh4ck3r - June 19, 2014, 2:24 pm

Does this work with the latest version of Java ?

Back Man - June 19, 2014, 2:32 pm

JDB currently supports the latest version of Java.

As our SJDB is currently being updated since it was only supported on a bugged version a long time ago. [AS FOR EVERYONE ELSSES]

Can't both be true?I got vouch copy for few days, does that makes any sense now?

Back Man - June 19, 2014, 3:40 pm

NO LONGER GIVING AWAY VOUCH COPYS HOWEVER I WILL SELL THIS LIMITED TIME FOR 5 DOLLARS!

Peppermint Butler - June 19, 2014, 3:49 pm

Your telling me this is the first JDB that can retrieve victims that are running the newst java versions?

Razza™ - June 19, 2014, 3:51 pm

I was the original coder of the project so I can definitely vouch for the functionality of it.

Back Man - June 19, 2014, 3:57 pm

(Jun 19, 2014 03:51 PM)Razza™ Wrote: [\[CITE\]](#) I was the original coder of the project so I can definitely vouch for the functionality of it.

Thanks for the vouch, but I've decided to implement many new features and recode most of it from scratch, as it did not work when I received the source. :D

Peppermint Butler - June 19, 2014, 4:13 pm

Lol, I'll pm you if your going to ignore my question. :P

Would like to know this also, otherwise whats different from any other JDB out there? Not trying to Sales Trash or anything, just curious because you said in the OP private methods and I was wondering what this offers apart from any other one,.

Back Man - June 19, 2014, 4:29 pm

(Jun 19, 2014 04:21 PM)OICN Wrote: [\[CITE\]](#) Would like to know this also, otherwise whats different from any other JDB out there? Not trying to Sales Trash or anything, just curious because you said in the OP private methods and I was wondering what this offers apart from any other one,.

I never said its the first JDB too. Mine can run through the newest java version EXCEPT for the SJDB. Which is many updates behind because it's not possible to use SJDB for newer versions.

Mine has a huge stability improvement , as long as much more features sir.

Peppermint Butler - June 19, 2014, 4:31 pm

He pm'd me saying it does, but it's a little hard to believe though haha.

I would like to see a video or some form of proof, then I will definitely proceed to buying this!

How is that hard to believe?? every other JDB has updated to the latest version as well. I will gladly show you on Teamviewer, ALSO FOR EVERYONE ELSE Do not even try to sales trash.

Peppermint Butler - June 19, 2014, 4:35 pm

(Jun 19, 2014 04:33 PM)Back Man Wrote: [\[CITE\]](#) How is that hard to believe?? every other JDB has updated to the latest version as well.

Not really, most JDB's just have their interface/panel running on the newst update, but the downfall to most JDB's is that they don't execute your file on people that have the latest version.

Back Man - June 19, 2014, 4:36 pm

It really depends on how their security settings are. I've had plenty of successful installs :) , I will be adding you on skype right now by the way.

Kuky - June 19, 2014, 4:42 pm

(Jun 19, 2014 04:36 PM)Back Man Wrote: [\[CITE\]](#) It really depends on how their security settings are. I've had plenty of successful installs :) , I will be adding you on skype right now by the way. latest is set by default to high which blocks all self signed certs

Back Man - June 19, 2014, 4:46 pm

(Jun 19, 2014 04:42 PM)Kuky Wrote: [\[CITE\]](#) latest is set by default to high which blocks all self signed certs

Yup currently you can't BYPASS it. Like I said above it still works on all versions as I am currently working on a fix for the latest so it doesn't get blocked, which can be done with certain certificate features.

Kuky - June 19, 2014, 4:52 pm

you'd need to buy a certificate from a 3rd party approved org, be added to the whitelist or find a Oday

Back Man - June 19, 2014, 4:55 pm

Yup, I am working on this to see what I can currently do...

Also for everyone else.

Please remember there is no solution for java v7 u50 and up to 60 for now. Unless there settings are low OR I can figure out a resolution to get a legit certificate .

Kr?nus - June 20, 2014, 10:09 am

VOUCH for Back Man! His JDB works like a charm. Don't hesitate to buy.

¹³³⁷ - June 20, 2014, 8:48 pm

5\$ for lifetime license or just 1 JDB.

Peppermint Butler - June 20, 2014, 10:11 pm

(Jun 20, 2014 08:48 PM)lasski Wrote: [\[CITE\]](#) 5\$ for lifetime license or just 1 JDB.

It's lifetime.

He's currently banned for some type of marketplace violation or Dealing outside of HF.

You can still contact him on Skype right now though.

BarsZ - June 21, 2014, 5:34 pm

I also vouch for Back Man! His JDB works smooth and perfect thanks. Was totally worth the 5\$

Appliance Warehouse - June 21, 2014, 9:14 pm

JDB's don't work on the recent version of Java, as it has been patched. This is outdated.

If this somehow works for the latest version of Java, please send me a PM with proof and I will buy

Poserver.exe - June 21, 2014, 9:52 pm

Read previous comments coder is working on the new java update

corrupted102 - June 21, 2014, 9:57 pm

+Vouch! Just purchased PureJDB it worked great, especially for the price!

Kuky - June 22, 2014, 3:18 am

Looks like the owner is gone. Not worth buying now

corrupted102 - June 22, 2014, 7:42 am

(Jun 22, 2014 03:18 AM)Kuky Wrote: [\[CITE\]](#) Looks like the owner is gone. Not worth buying now he is still on skype. do not hesitate to add him and still buy
