Thread: [Whatsapp API Website \(Source\) Extremely Easy Detailed Tutorial](#)

markzuckerberg - June 19, 2014, 12:29 pm

Hello HF

Today i saw a website called Upload To Whatsapp this website is so cool it lets you to send a media, text to the number you need (Worldwide).

If you dont know it : [View](#)

Anyways i searched on Google for a good tutorials but all of them are half tutorial, Well.. Read many and collected all the information from the websites to share this!

Let's Begin!

First of all this tutorial needs :

- 1-Your whatsapp password
- 2-Your Whatsapp ID
- 3-Gmail Account (Verified because if not you will get some errors)

For 1 and 2 ([Read this tutorial](#))

For 3 ([Sign Up](#))

-Download the Project : [Download Link](#)

-Upload it to your ftp

Open whatsapp.php file and head to line 62

PHP Code

```
<?php
$config['Whatsapps'] = array(
'id' => 'Your ID Goes HERE ',
'fromNumber' => 'your number that youve registered on with the program',
'nick' => "Online Whatsender",
'waPassword' => "PASSWORD that you got from the program",
'email' => 'GMAIL Email ',
'emailPassword' => 'Gmail Password'
```

Now the configuration is done.. Visit your website it will look like this :

The default one is MakeUpPassword for changing it you need to

Open whatsapp.php file and head to line 36

PHP Code

```
<?php
```

```
$config['webpassword'] = 'MakeUpPassword';
```

Now enter the password and click the Sign in button

Success, it will redirects you to this :

1- First Dropdown includes :

1.1- Send a message (Sending a text message with or without emoji)

1.2-Broadcast message (Sending a text message with or without emoji to unlimited numbers)

2-second dropdown includes :

2.1 Your Api that you need to connect (Before doing anything, You need to select the api you configure because without selecting it you won't be able to send.)

3-Third Dropdown includes :

3.1 Select a contact (The number you want to send for)

4- People, Nature, Object,Places, Symbols (Emoji)

5-Paragraph box (Type in the message you need to send)

6- Sending your location (it works with Google maps)

We're Done

Waiting your Feedbacks!

if there's an error please post the error and i'll help you out just comment :Victoire: ..

Well mate, Good question but whatsapp api is not only a messenger for fun or chat.. too many people needs this for many reasons or starting with this and ends with a project.

MrJulma - June 28, 2014, 10:02 am

This is great tutorial. I followed all steps and its working. Now if im out of power on my phone i can still send messages :)

Only minus on this one is that you cant use this app sametime with mobile app.

But i founded nice glitch with this app.

First you need to open whatsapp on your phone and then config website with your phone.

Then try to send message for someone in your WEBSITE.

Then your Whatsapp logs out and ask`s to verifaction. Just enter your phonenumber and wait and you get free year on whatsapp. You dont lose any messages or anything.

This is like a free unlimited whatsapp:D

// Sorry for bad english.

Talu - June 28, 2014, 12:35 pm

Looks like a good tut, will look into it.

markzuckerberg - June 28, 2014, 4:30 pm

What is wrong ?

Oh the demo? it's not coded by me and yea :

The service is down for maintenance

but it's a tutorial so make one ?

hsein_tohmaz - August 20, 2014, 4:34 am

thank for this , but can you tell us how we can import picture and video ? thank you bro

markzuckerberg - August 25, 2014, 8:39 am

You're welcome mate!! Soon i will make a tutorial ! ?

Tiggggger - August 25, 2014, 10:26 am

the tutorial is cool thank you that you have made it ready

jelletheman - August 25, 2014, 10:41 am

Fuck, down for maintenance :(

Anyway, does it show your number when texting someone?

Injexion - August 25, 2014, 3:55 pm

Great job! I like it, gonna use it soon.

cherokee - August 26, 2014, 6:08 am

This is great tutorial. I followed all steps and its working.
