Thread: [Pimp My Minecraft](#)

Hello Minecraftians, I was just wondering if there were some hardcore builders here on the HF community. I recently have been watching the "Pimp My Minecraft" series on youtube and was wanting to develop something like this but for HF users and servers. Are there any builders that would be up to make a small team with me to do this? I may make a recruitment for a unofficial group in the group section of the forums as well. Post below!

Holy shit. I'm crap at building but would be extremely overjoyed if my Minecraft got pimped. XD.

I am certainly not up to there standards, but I'm a pretty good builder,
I have made alot of server spawns in the past,
and would be willing to join your crew free of charge :P

Check the recruitment on the groups tab! Would love to have anyone interested.
